

Evaluation Criteria and Assessment Structure for Master's Degree Theses and Papers

Evaluation Criteria

Most of the students at GRIPS are mid-career bureaucrats sent from governmental organizations, so master's theses are aimed at improving the students' policymaking ability. Specific policy issues that are of interest to each individual student are selected, with analyses of policy effectiveness based on inter-disciplinary academic fields (e.g., economics, politics, public administration, engineering) and on policy evaluation. In evaluation of master's theses or research papers on specific topics, the criteria for assessment shall be determined by objective and rational analyses based on various scholarly methodologies appropriate to the topic's distinguishing features, as determined independently by each respective program.

Each program must thoroughly disseminate the evaluation criteria during the orientation process at the start of each course.

Assessment Structure

Each program should organize viva voce presentations that include question and answer sessions, with the assessment status decided by judges including academic supervisors and program committee members. Based on the assessment results, final passing status will be determined by the Academic Council following an assessment by the Master's Programs Committee.

Graduation Requirements

4. Degree Programs for Master's Students

Program	Credit Requirement	Thesis Requirement	Degree
Young Leaders Program	(School of Government) Students must complete a minimum of 30 credits, of which 13 must come from Category I, 8 from Category II, and the rest from Categories II and/or III of the Young Leaders Program curriculum (School of Government). (School of Local Governance) Students must complete a minimum of 30 credits, of which 17 must come from Category I, 6 from Category II, and the rest from Categories II and/or III of the Young Leaders Program curriculum (School of Local Governance).	Students must produce a paper on a topic in their area of independent study and submit it in the prescribed format. They must also give a presentation of the content of the paper. The Program Director will provide guidance in this matter.	Master of Public Administration Master of Public Policy
One-year Master's Program of Public Policy (MP1)	Students must complete a minimum of 30 credits, of which 6 must come from Category I and the rest from Category III of the One-year Master's Program of Public Policy (MP1) curriculum.	Students must produce a policy report and submit it in the format prescribed by the concentration to which they belong. The concentration leaders will provide guidance in this matter.	Master of Public Policy Master of Public Administration
Two-year Master's Program of Public Policy (MP2)	Students must complete a minimum of 40 credits, of which 12 must come from Category I and the rest from Category III of the Two-year Master's Program of Public Policy (MP2) curriculum.	Students are expected to find and develop their thesis topics during the first year's coursework. In the second year, students should devote a substantial amount of time to writing their theses on the topic of their choice.	Master of Arts in Public Policy
Macroeconomic Policy Program (One-year Program)	Students must complete a minimum of 34 credits, of which 19 must come from Category I, 10 from Category II, and the rest from Category II and/or III of the Macroeconomic Policy Program (One-year Program) curriculum.	Students must produce a paper on a topic in their area of independent study and submit it in the prescribed format. They must also give a presentation of the content of the paper. The Program Director will provide guidance in this matter.	Master of Public Policy Master of Public Economics
Macroeconomic Policy Program (Two-year Program)	Students must complete a minimum of 44 credits, of which 21 must come from Category I, 16 from Category II, and the rest from Categories II and/or III of the Macroeconomic Policy Program (Two-year Program) curriculum.	Students must produce a thesis and submit it in the prescribed format, and give a presentation on the thesis. The Program Director will provide guidance in this matter.	Master of Arts in Public Economics

Program	Credit Requirement	Thesis Requirement	Degree
Public Finance Program	<p>Students are required to complete a minimum of 34 credits, of which a portion must come from designated courses in Category III and X of the PF program curriculum.</p> <p>A. Tax scholars must complete the following practicum courses in Category I: PFP2520E and PFP5010E.</p> <p>B. Customs scholars must complete the following practicum courses in Category I: PFP5110E, PFP5120E, PFP5130E, and PFP5210E.</p> <p>Both Tax and Customs scholars must complete the following Category I courses: ECO1000EB, ECO3102E, ECO4120E, ECO4130E, and GEN5020E.</p>	<p>Students are required to produce a policy paper on a topic related to their respective streams, with the guidance of a supervisor. Additionally, they must deliver a presentation on the policy paper and submit the final version in the prescribed format. The Program Director will provide guidance in this regard.</p>	Master of Public Finance
Economics, Planning and Public Policy Program (Indonesia Linkage Program)	<p>Students must complete a minimum of 30 credits, of which 5 must come from Category I and the rest from Categories II and/or III of the Economics, Planning and Public Policy Program curriculum and others.</p>	<p>One requirement for the master's degree is the submission of a research paper on a specific topic. The independent study advisor and the topic will be determined through discussion with the Program Committee.</p>	Master of Public Policy
Disaster Management Policy Program	<p>(Seismology, Earthquake Engineering and Tsunami Disaster Mitigation)</p> <p>Students must complete a minimum of 30 credits, of which 10 must come from Category I, 6 from Category II, and the rest from Categories II and/or III of the Disaster Management Policy Program (Seismology, Earthquake Engineering and Tsunami Disaster Mitigation) curriculum.</p> <p>(Water-related Disaster Management)</p> <p>Students must complete a minimum of 30 credits, of which 10 must come from Category I, 16 from Category II, and the rest from Categories II and/or III of the Disaster Management Policy Program (Water-related Disaster Management) curriculum.</p>	<p>One requirement for the master's degree is the submission of a research paper on a specific topic. The individual study instructor and the topic will be determined through discussion with the teaching staff.</p>	Master of Disaster Management
Maritime Safety and Security Policy Program	<p>Students must complete a minimum of 30 credits, of which 22 must come from Category I, 8 from Category II, and the rest from any category of the Maritime Safety and Security Policy Program curriculum.</p>	<p>During the course of one year, students are required to write a research paper on a topic relevant to maritime safety and security.</p>	Master of Policy Studies
Strategic Studies Program	<p>Students must complete a minimum of 31 credits (excluding credits for class subjects belonging to Category X), of which 22 must come from Category I and 9 from Category II of the Strategic Studies Program curriculum.</p>	<p>Students must pass (a) an examination on the results of their research on a specific topic, and (b) the final examination.</p>	Master of Policy Studies

Master's Programs

Master's Programs (International Programs)

Young Leaders Program (School of Government/School of Local Governance)

The Young Leaders Program (YLP) is a scholarship program sponsored by the Japanese Ministry of Education, Culture, Sports, Science and Technology. GRIPS inaugurated the YLP School of Government in 2001, and the YLP School of Local Governance in 2009. The objectives of the YLP program are:

1. To foster future national leaders from designated countries;
2. To build comprehensive human networks among the leaders of nations;
3. To establish friendly relationships among the countries involved, including Japan; and
4. To improve the quality of policy making in the participating countries.

This program is open to exceptionally promising young government officials with considerable working experience in the area of public administration.

A minimum of three years' work experience in the field in the applicant's home country is a prerequisite for admission to the program. Students will be admitted on the basis of an appraisal of their potential to become future leaders in their home countries; to play important roles in their countries' development; and to maintain a lasting friendship with, and trust of, Japan and other countries around the world.

The program is designed to expand students' comparative and historical knowledge of international/regional politics and economics, while providing them with an in-depth understanding of Japanese politics and economy.

The curriculum covers a wide range of topics concerning public administration and policy formulation, and offers the students the opportunity for intensive discussion with politicians, high-level government officials, corporate directors, journalists, and other Japanese leaders. The program also includes a field trip/workshop and the writing of a final paper based on the student's independent study.

One-year Master's Program of Public Policy (MP1)

This program primarily targets mid-career public officials with excellent academic and work credentials, managerial experience, and strong leadership potential. The program equips future managers and leaders with the basic skills and knowledge needed for policy analysis and management. To date the program has produced a steady stream of highly qualified professionals in the public policy arena.

The program offerings consist of both required and elective courses. The core courses provide all MP1 students with a common interdisciplinary and analytical foundation. Students acquire more specialized knowledge by selecting courses in one of four concentration areas: Economic Policy, International Development Studies, International Relations, and Public Policy. A wide range of elective courses offers students the opportunity to broaden and deepen their knowledge. Also offered are practical courses delivered by government officials with extensive experience in actual policy formulation and implementation.

MP1 students are required to produce a policy report in one of the four concentration areas. Policy Debate Seminar I facilitates the students' development and the exchange of ideas related to their policy reports, in the concentration of their choice. In Policy Debate Seminar II, the students finalize their studies and write up their policy reports with the support of their supervisors.

MP1 is primarily aimed at mid-career professionals and staff members from local or national governments and international organizations. Highly qualified individuals with an interest in public policy are also welcome to apply. Financial support is available on a competitive basis. Asian Development Bank (ADB) scholarships are open to application by government officials from Asian countries. Japanese government scholarships are open to application by government officials and researchers from all over the world.

Two-year Master's Program of Public Policy (MP2)

This program aims to provide early and mid-career professionals with the technical skills needed to analyze, design, and implement public policy. The program provides a strong platform for advanced research (including doctoral studies). Students are required to write a master's thesis in one of four areas of public policy: Economic Policy, International Development Studies, International Relations, and Public Policy. In addition to policy workshops, students receive specialized guidance through a program of independent study.

MP2 has a similar structure to that of the one year program, but MP2 students receive more advanced training and guidance in the technical skills needed for public policy analysis. All MP2 students develop a common interdisciplinary and analytical foundation through the core courses. They select from one of four concentration areas and take specialized courses that provide them with strong analytical and quantitative skills. They also have the opportunity to choose from a wide variety of elective courses in academic and practical topics. In their second year, the students utilize their technical skills and practical knowledge in the writing of a master's thesis under the guidance of a highly-trained specialist in their chosen field of concentration.

MP2 welcomes applications from individuals with a strong interest and aptitude for policy analysis. The primary target is promising early and mid-career officials and staff members in local or national governments, international organizations, and research institutes. Highly qualified individuals interested in a career in the public policy field are also welcome to apply. Candidates should have strong academic credentials and a desire to obtain the analytical and quantitative skills needed for the work of professional policy analysts. Financial support is available on a competitive basis, including scholarships from the Asian Development Bank (ADB) and the Japanese Government.

Macroeconomic Policy Program

The Macroeconomic Policy Program (MEP) is a professionally oriented program designed to train modern macroeconomic policy makers and professionals, giving them an understanding of macroeconomic fluctuations and the roles of monetary and fiscal policies in domestic and global

economies, so that they will enhance the capacity of governments to formulate and implement financial and economic policies in a manner that leads to quality growth. The curriculum deals with macroeconomic and structural aspects, including policies aimed at establishing sound macroeconomic fundamentals, liberalized trade, a robust financial system, and a vast private sector. Ample attention is also given to a broader range of issues, such as roles of government; institution building; environmental issues; and sustainable development.

Scholarships for this program, provided by the Japanese government and administered by the International Monetary Fund (IMF), are open to application by promising young officials from the following Asian countries: Bangladesh, Bhutan, Cambodia, India, Indonesia, Kazakhstan, Kyrgyz Republic, Laos, Malaysia, Maldives, Mongolia, Nepal, Pacific Island countries, Papua New Guinea, Philippines, Sri Lanka, Tajikistan, Thailand, Timor-Leste, Turkmenistan, Uzbekistan, and Vietnam. The program is primarily aimed at officials of ministries of finance, economy, and planning, and of central banks. However, suitable candidates from other parts of government are also admitted.

Public Finance Program

The Public Finance Program, launched in 1997, is operated by GRIPS and fully supported by the World Bank and the World Customs Organization.

The Public Finance Program is designed specifically for professionals in the field of taxation and customs. The major objective of the Public Finance Program is to equip students with both the theoretical knowledge and practical skills necessary to excel as leaders in these areas. The program is comprised of two segments: an academic segment common to tax and customs scholars; and a practicum segment, which is devoted to tax or customs, depending on the scholar's stream.

The academic segment of the program provides rigorous economics-oriented training aimed at developing an understanding of the theoretical, empirical, and institutional aspects of tax and customs policy implementation and administration in the context of the economic and social development of developing countries. A practicum operated by or in collaboration with the National Tax Administration or

4. Degree Programs for Master's Students

the Customs Training Institute gives students an opportunity to enhance their learning with hands-on experience in a tax/customs-related work environment and to integrate that experience into their formal education.

Economics, Planning, and Public Policy Program

This program is designed to enable government officials to contribute to good governance and economic development in Indonesia.

Indonesia is undergoing an enormous transformation. The “two D’s”—robust democratization and radical decentralization—are fundamentally reshaping the country's political, economic and social landscape. To help Indonesia meet the challenges arising as a result of this transformation, the GRIPS-Indonesia Linkage Master's Program (LMP) was designed to develop highly capable central and local government officials well equipped to contribute to Indonesia's capacity to continue on the road to good governance and economic prosperity.

This collaborative academic program is offered by GRIPS in cooperation with Indonesia's premier national universities: Universitas Indonesia; Universitas Gadjah Mada; Universitas Brawijaya; and Universitas Padjadjaran. During the two-year program, with the first year offered in Indonesia and the second at GRIPS, the students enjoy excellent opportunities to combine theory with practical skills, and research with action. Special emphasis is placed on developing core skills in areas that will be valuable to them: economics, political science, public policy, and public management. The Program's approach is multidisciplinary and covers a wide range of topics, allowing the fellows to select the courses that suit their individual needs.

GRIPS offers LMP students a distinctive learning environment in which they have abundant opportunities to interact with and learn from a diverse international group of faculty members and their own peers, mid-career government officials from all over the world. In addition, the faculty's vast network of contacts and the ideal location of the campus in the heart of metropolitan Tokyo offer the students easy access to the Japanese policymaking community.

Disaster Management Policy Program

Natural disasters result in crippling economic losses and human tragedy, in turn hampering development, particularly in developing countries, where many people reside in vulnerable buildings and areas. In order to mitigate the effects of natural disasters, particularly human losses, there is a need to promote proactive disaster risk management, preferably in a multi-disciplinary fashion. To that end, it is essential to cultivate, through professional education and training, disaster management experts with the expertise to develop appropriate disaster management policies and techniques that harmonize with local conditions, and put those policies and techniques into practice.

In order to enhance the capacity of professionals in developing countries to cope with natural disasters, GRIPS offers a master's degree program in Disaster Management Policy in collaboration with the International Institute of Seismology and Earthquake Engineering (IISSEE) of the Building Research Institute (BRI); the International Centre for Water Hazard and Risk Management (ICHARM) of the Public Works Research Institute (PWRI); and the Japan International Cooperation Agency (JICA). This program is administered as a JICA Knowledge Co-Creation Program, supported by official development assistance from the Government of Japan.

This program is designed to give disaster risk management professionals from developing countries an opportunity to: study in one of the four courses (seismology, earthquake engineering, tsunami disaster mitigation, and water-related disaster management); obtain foundation disaster risk management knowledge; study the theories which constitute the foundation of disaster management policy; study Japanese disaster management policy and systems; and acquire the ability to apply problem-solving approaches to the development of concrete technologies and policy appropriate to local conditions.

In addition to developing expertise in their areas of study, the students will obtain a bird's-eye view of the entire field of disaster management, beyond the limits of their specializations; they will attend lectures, make presentations, and engage in discussions of topics related to the field of disaster management in order to deepen their understanding of other research areas. They will also have an

opportunity to take part in group fieldwork in locations across Tokyo. This fieldwork brings together students with different specializations, from governments and organizations of a number of countries, for an innovative two-day exercise in which they give joint presentations with Japanese students from the Disaster Risk Management Concentration and the Infrastructure Policy Concentration.

Maritime Safety and Security Policy Program

The MSP is a collaborative program administered jointly by GRIPS and the Japan Coast Guard (JCG). This program makes it possible for the students to benefit from both institutions' resources in the fields of public policy, international relations, and maritime safety and security. The students will have the opportunity to acquire advanced knowledge, analytical and communication skills relevant to their work while becoming members of a network of future coast guard leaders in the Indo-Pacific.

With financial support from the Japan International Cooperation Agency (JICA), junior coast guard officers from different parts of the Indo-Pacific region will study at GRIPS in Tokyo during the first half of the academic year and in Kure, Hiroshima at the Japan Coast Guard Academy (JCGA)—the JCG's most important educational institution—during the second half of the academic year.

Study at GRIPS

After enrolling in the program, the students will take required and elective courses at GRIPS from October through March. The students are expected to gain advanced knowledge in the fields of public policy and international relations, and to nurture general academic skills to prepare for research paper writing.

Study at the JCGA

From April through July, the students will take courses and participate in practical training and educational programs at the JCGA. The students will attend lectures focusing on past maritime incidents and possible future scenarios, offered by leading experts and JCG officers.

Research Paper

Over the course of the year, each student will write a required research paper on issues relevant to the

study of maritime safety and security, to be completed before graduation. Each student will work with two academic advisors—one each from GRIPS and JCGA.

Master's Programs (Domestic Programs)

Public Policy Program

This program targets individuals from a wide variety of backgrounds relevant to policy research. The students include: administrative officials who are candidates to become executive officers in central government ministries and agencies, in local governments, and in private companies; and aspiring policy analysts. The Program is designed to cultivate professional leaders and innovative policy analysts who possess not only a high level of technical knowledge but also an awareness of the social responsibilities attendant upon their positions.

In some concentrations, students are required to take courses delivered in English. All students are recommended to take such courses. Students who complete five courses delivered in English will receive a Global Studies Course certificate of completion.

Regional Policy Concentration

Regional areas today face a great number of dilemmas, problems, and opportunities, and only through rigorous analysis and planning can decision makers arrive at policies that support the growth and development of a particular region. The Regional Policy Concentration is designed to prepare local government officials/professionals to examine and analyze regional problems, devise effective strategies for solution of those problems, and guide the implementation of those strategies. The Concentration teaches public policy knowledge and techniques, with an emphasis on regional issues, to a target group of junior and mid-career local government officials who, as future local government executives, will be implementing policy initiatives and devising new strategies.

The Concentration's core courses give the students a firm basis for logical thinking and analysis, develop their sensitivity to policy problems, and enhance their planning capability. The curriculum also includes a policy research seminar and several other courses in which students are exposed to a broad array of issues, information, and methods. In the seminar, the students develop relevant solutions to real-world policy issues faced

by local governments. Each student prepares a proposal paper in which they present their own policy issue responses.

Cultural Policy Concentration

This concentration is designed for leaders in cultural policy, including art management; its purpose is to cultivate professionals and specialists in the field of cultural policy. Graduates are expected to play leading roles in cultural policy research and/or the design and implementation of future cultural policy, cultural administration, and cultural diplomacy in Japan. The Concentration is geared toward Japanese junior and mid-career government officials, as well as others with a serious interest in cultural policy issues. The Concentration's faculty conduct cutting-edge research, applying quantitative analytical techniques to data acquired in field studies, in order to provide a sound basis for government decisions regarding cultural policy.

Infrastructure Policy Concentration

This concentration is designed for infrastructure policy professionals; its objective is similar to that of the Public Policy Program. However, the particular focus of this concentration is the implementation of infrastructure projects. The concentration seeks to attract not only junior and mid-career officials in national government, but also staff of public and quasi-public corporations, and private companies involved in implementing infrastructure projects in cooperation with the public sector. Whereas candidates for the Public Policy Program typically have undergraduate training in law, economics, political science, or public administration, the Infrastructure Policy Concentration is mainly geared toward individuals with a civil engineering background.

In addition to addressing policy questions, the concentration is concerned with critical evaluation of the impact of policy at strategic and practical levels. It aims to give the students a firm grounding in economics and management and familiarize them with the basic policymaking tools needed for work toward the socio-economic development of a country. Other main subjects include: economics of the public sector, private finance initiatives, project feasibility and evaluation methods, project cycle management, project implementation, and global issues for sustainability.

Disaster Risk Management Concentration

The 2011 Great East Japan Earthquake Disaster revealed that Japan, which is one of the most advanced countries in the field of disaster mitigation should further improve its disaster risk management policies, including, mitigation, preparedness, emergency response, recovery, and reconstruction.

This concentration aims to provide the students with an opportunity to learn about the latest policies and issues in the field of disaster risk management, based on lessons learned from recent disasters, to equip them to develop policies and take appropriate actions on a multi-disciplinary basis, before, during, and after disasters. This program seeks to attract national and local government officers and staff of public and private organizations who are involved in, or will be involved in disaster risk management. The curriculum provides the foundation practical, legal, economic, and technological knowledge essential for disaster risk management work.

Healthcare Policy Concentration

Recent unprecedented population aging phenomena have made healthcare one of the most important policy areas. This is not only healthcare in the narrow sense but also healthcare as an inclusive concept, encompassing long-term care, welfare, employment, and even urban planning.

The COVID-19 pandemic has added another difficult variable to the array of healthcare challenges. This Concentration is designed to give the students: 1) the foundation knowledge, theory and analytical techniques needed for regional policy work; 2) a solid understanding of the essence of healthcare challenges; and 3) the skills needed to formulate comprehensive policies regarding healthcare and related issues.

The core courses are theoretical and comprehensive, but at the same time they have a practical component essential for the design of healthcare policy: in addition to the course lectures, delivered by faculty with deep knowledge of and extensive experience in the field, guest lectures are given by invited speakers such as government officers from Japan's Ministry of Health, Labour and Welfare, and practicing medical doctors.

Agricultural Policy Concentration

In recent times domestic lifestyles in Japan have been changing as a result of declining birthrate and aging population; at the same time, global food markets have been growing. This situation calls for regional revitalization and the encouragement of population movement to rural areas. There is also a need for new techniques such as adding value to agricultural products through the development of regional charm. Such approaches require innovative policy formation, and steady implementation of such policy in cooperation with private sector partners such as agriculture, forestry, fisheries and food industry enterprises. The agricultural policy concentration aims to give the students a deep understanding of policy trends and issues in agriculture and related fields, by (a) developing human resources who can lead regional policy development, and (b) offering training in the necessary public policy theory, knowledge, and analytical methods.

Science, Technology and Innovation Policy Concentration

In a knowledge-based society, where knowledge has a major impact on economic and social development, the role of science, technology, and innovation policies is rapidly expanding, not only in the development of scientific knowledge, but also in the creation of new industries and the resolution of social issues such as those addressed by the SDGs. Also, in the age of digitization, research development and innovation methodology have changed; this calls for an understanding of the form that policies and management should take.

This concentration aims to cultivate human resources who can apply a scientific approach to the planning, drafting, execution, evaluation and revision of STI policy and strategy. In particular, we intend to equip administrative officials and practitioners with the skills they need for STI policy analysis and planning.

International Cooperation Concentration

The Sustainable Development Goals (SDGs) are an urgent call for action by all countries in a global partnership. Aiming to contribute to the achievement of the SDGs, this concentration is designed for future leaders in the field of

4. Degree Programs for Master's Students

international development and international cooperation. The concentration seeks to attract officers of central and local governments, international/aid organizations, NPOs, private companies, and the like. Graduates of this concentration are expected to play leading roles in this area within and outside Japan.

This concentration, as an integral part of the domestic program, aims to cultivate professionals in public policy. At the same time, English is the language of instruction for the courses; domestic students are expected to discuss issues related to international development with foreign students, most of whom are mid-career government officials from other countries. Together with other elective courses, the courses in this curriculum enable students to develop valuable skills and cultivate domestic and international networks.

Open Concentration

Aiming to meet diverse needs, this concentration focuses on cultivating problem analysis and policy planning skills, with the aim of fostering Open Concentration graduates who will be equipped to make valuable contributions in the field of public policy.

Each student chooses a main field of study (e.g., diplomacy, defense, public finance, monetary policy, industry, trade, environment, labor, or social security) and registers for five courses related to her/his chosen field. It is strongly recommended that the students also complete the Global Studies Course.

Science, Technology and Innovation Policy Program

In a knowledge-based society, where knowledge has a major impact on economic and social development, the role of science, technology, and innovation policies is rapidly expanding, not only in the development of scientific knowledge, but also in the creation of new industries and the resolution of social issues such as those addressed by the SDGs. Also, in the age of digitization, research development and innovation methodology have changed; this calls for an understanding of the form that policies and management should take.

This program aims to foster both a) skilled professionals who can plan, draft, implement, evaluate and revise science and technology innovation (STI) policy and strategies using

scientific approaches; and b) well-prepared Ph.D. entrants who aim to become researchers. In order to give the participants the advanced policy research capabilities and the ability to plan and implement policy and strategy that are required of such human resources, the curriculum is designed to equip them with knowledge and skills in multiple essential disciplines; analytical skills in various fields of social science; and foreign language skills.

The program duration is two years. The classes are held in the evenings and on Saturdays, which makes it possible for students to obtain a master's degree without taking leave from their jobs.

Strategic Studies Program

The Strategic Studies Program, offered jointly by GRIPS and the National Institute for Defense Studies (NIDS) of the Japanese Ministry of Defense, is designed to give senior military officers and defense officials theoretical and practical knowledge of advanced level strategic and defense issues, and training in the application of that knowledge. Through the program, the students will enhance the effectiveness of their analysis of domestic and international strategic environments; their planning and implementation of policy; and their ability to operate multinational security missions.

In the course of the year, the students will take required and elective courses at both GRIPS and NIDS. The required courses, on topics including theoretical aspects of security studies, military history, and contemporary policy issues, provide a critical basis for advanced security studies. The elective courses give students (a) deeper knowledge of both broad and specialized issues, including issues related to civil-military relations; space and security; the defense industry and technology; regional security affairs of the United States, China, Korea, Southeast Asia, South Asia, and the Middle East; and (b) a strong command of methods for analysis of the international strategic environment.

In addition, the program conducts policy simulations to enable the students to apply their classroom learning to actual policy formulation and implementation processes. The students receive instruction in issues related to policymaking; conduct actual research; and engage in group debates on different aspects of security policy issues, embedded in a variety of scenarios. They

will also learn practical lessons about effective coordination with government agencies and foreign countries.

Finally, while the students are completing their course work, each student is expected to write research paper, equivalent to a master's thesis, on relevant theoretical and/or policy issues. Although conducted as a domestic program, students are encouraged to write this paper in English, and relevant assistance will be provided in doing so.

Global Leadership Development Program

Amidst international clashes of interests in the 21st century, where multilateral diplomacy is frequently undertaken alongside conventional bilateral diplomacy, there is ever more demand for professionals who are well-versed in international affairs, skilled in strategic thinking, and possess excellent communication skills. Such diplomacy-related skills are required not only of diplomats, but also of those in diverse leadership roles throughout government ministries and agencies, quasi-governmental organizations, and city and municipal governments. Moreover, companies facing rapid changes in international affairs are in need of human resources who can accurately judge geopolitical risks as they negotiate with their counterparts and work to appeal effectively to foreign governments, international organizations, and NGOs. The media, too, are expected to go beyond simply broadcasting news on international affairs; they are also expected to effectively communicate information about Japan to the rest of the world.

The Global Leadership Development Program, which emphasizes practical training in tandem with a systematic understanding of international relations, is dedicated to developing human resources equipped with genuine diplomatic skills, who can provide any organization with planning and negotiation skills appropriate for competitive international settings. Coursework in the program is multi-disciplinary, incorporating theoretical and practice-based study; it is delivered in both Japanese and English. Each student is required to write a master's thesis or policy paper in English, to be submitted by the end of second year.

4. Degree Programs for Master's Students

Summary Table of Master's Programs

	Program	Summary
Commence in Fall conducted in English	Young Leaders Program (School of Government/School of Local Governance)	Designed for future national leaders of countries in Asia and other regions
	One-year Master's Program of Public Policy (MP1)	Designed primarily for mid-career professionals and staff members in local or national governments and international organizations, to provide them with the basic skills and knowledge required for policy analysis and policy management
	Two-year Master's Program of Public Policy (MP2)	Designed primarily for early- and mid-career professionals and staff members in local or national governments, international organizations, and research institutes with the aim of equipping them with the technical skills for analyzing, designing, and implementing public policy
	Macroeconomic Policy Program (One-year Program, Two-year Program)	Designed for policy makers and professionals using modern macroeconomic theory and policy
	Public Finance Program	Designed for fiscal leaders in taxation and customs
	Economics, Planning and Public Policy Program (Indonesia Linkage Program)	Designed to enable government officials to contribute to good governance and economic development in Indonesia
	Disaster Management Policy Program	Designed for disaster risk management experts from developing countries
	Maritime Safety and Security Policy Program	Designed for future leaders of the coast guard organizations in the Indo-Pacific and other regions.
	Strategic Studies Program	Designed to provide practitioners with the expertise they require to assume responsibility for the formulation and implementation of policy related to security and defense
	Public Policy Program Regional Policy Concentration	Designed for local government officials who take a lead in analyzing and solving regional problems
Commence in Spring conducted in both Japanese and English	Cultural Policy Concentration	Designed for leaders in cultural policy and art management
	Infrastructure Policy Concentration	Designed for professionals in the field of infrastructure policy
	Disaster Risk Management Concentration	Designed for government officials and staff of public and private organizations who are or will be involved in disaster risk management
	Healthcare Policy Concentration	Designed for future leaders in the healthcare field
	Agricultural Policy Concentration	Designed for local government officials and other experts in the field of agricultural policy planning
	Science, Technology and Innovation Policy Concentration	Designed to provide government officials and practitioners with the skills they need to plan, draft, implement, evaluate and revise policies and strategies using scientific approaches
	International Cooperation Concentration Open Concentration	Designed for leaders in international cooperation Designed for public administrators and researchers Note: extensive knowledge of policy analysis is required.
	Science, Technology and Innovation Policy Program	Designed to foster both a) skilled professionals who can plan, draft, implement, evaluate and revise science and technology innovation policy and strategies using scientific approaches; and b) well-prepared Ph.D. entrants who aim to become researchers.
	Global Leadership Development Program	Designed to (a) provide government, industry, and media personnel with the diplomatic, analytic, and communication skills they require to fully grasp global political and economic issues, and (b) equip them to lead organizations in competitive international negotiations.

	* Selected Topics in Policy Studies I - IV					
III Elective Courses		Courses not listed in this table				
X Others		** Courses offered by the Center for Professional Communication				

Notes:

- Graduation Requirements: Students must complete a minimum of 30 credits, 5 of which must come from Category I and 25 from Category II (and III).
- Courses offered in the Program are subject to change.
- Students can not take courses conducted in Japanese without Director's approval.
If a student takes the same course in both English and Japanese, only one course (2 credits) will count toward the degree.
- * Course Number, Instructor, and Term for these courses will be announced when the courses are offered.
- ** Credits earned in these courses cannot count toward the degree.
- Students must take LAN0300E, LAN0310E and LAN0320E. Students may be exempted from taking LAN0310E depending on the result of the English Placement Test and may be exempted from taking LAN0320E if they obtain the approval of their main advisor.

Academic Year 2023-2024 Curriculum Master's Programs**(10)-1 Disaster Management Policy Program (Seismology, Earthquake Engineering and Tsunami Disaster Mitigation)**

Category	Course No.	Course Name	Instructor	Term	Credit	
I Required Courses	DMP4000E	Individual Study		Fall through Summer	10	10
II Recommended Courses	DMP2000E	Disaster Management Policies A: from Regional and Infrastructure Aspect	HIBINO Naohiko	Fall	2	
	DMP2010E	Disaster Management Policies B: from Urban and Community Aspect	KATAYAMA Koji	Fall	2	
	DMP3000E	Earthquake Hazard Assessment A	NAKAGAWA Hiroto	Fall through Spring	2	
	DMP3010E	Earthquake Risk Assessment	AZUHATA Tatsuya	Fall through Spring	2	
	DMP3030E	Tsunami Hazard Assessment	SHIBAZAKI Bunichiro	Fall through Spring	2	
	DMP3040E	Tsunami Countermeasures	FUJII Yushiro	Fall through Spring	2	
	DMP3050E	Earthquake Hazard Assessment B	HARA Tatsuhiro	Fall through Spring	2	
III Elective Courses	DMP3200E	Earthquake Phenomenology	KITA Saeko	Fall through Spring	3	
	DMP3210E	Characteristics of Earthquake Disasters	HARA Tatsuhiro	Fall through Spring	3	
	DMP3220E	Earthquake Circumstance	SHIBAZAKI Bunichiro	Fall through Spring	3	
	DMP3230E	Information Technology Related with Earthquakes and Disasters	HAYASHIDA Takumi	Fall through Winter	3	
	DMP3400E	Structural Analysis	OTSUKA Yuri	Fall through Spring	3	
	DMP3410E	Ground Vibration and Structural Dynamics	NAKAGAWA Hiroto	Fall through Spring	3	
	DMP3420E	Seismic Structures	OTSUKA Yuri	Fall through Spring	3	
	DMP3430E	Seismic Evaluation and Seismic Design Code	AZUHATA Tatsuya	Winter through Spring	3	
	DMP3600E	Theory of Tsunami	FUJII Yushiro	Winter through Spring	3	
	DMP5310E	Case Study (Practice for Earthquake Disaster - Recovery Management Policy I)	NAKAGAWA Hiroto	Fall through Winter	1	
	DMP5320E	Case Study (Practice for Earthquake Disaster - Recovery Management Policy II)	HAYASHIDA Takumi	Fall through Spring	1	
	DMP5330E	Case Study (Practice for Earthquake Disaster - Recovery Management Policy III)	MATOBA Moeko	Fall through Spring	1	
	DMP5340E	Case Study (Practice for Tsunami Disaster Mitigation Policy)	HARA Tatsuhiro	Fall through Spring	1	
	* Selected Topics in Policy Studies I -IV					

Notes:

1. This table applies to students in the Disaster Management Policy Program (Seismology, Earthquake Engineering and Tsunami Disaster Mitigation).
2. Graduation Requirements: Students must complete a minimum of 30 credits, 10 of which must come from Category I and 6 of which must come from Category II.
3. Courses offered in the Program are subject to change.
4. * Course Number, Instructor, and Term for the course will be announced later when the course is offered.

4. Degree Programs for Master's Students

Academic Year 2023-2024 Curriculum Master's Programs (10)-2 Disaster Management Policy Program (Water-related Disaster Management)

Category	Course No.	Course Title	Instructor	Term	Credit	
I Required Courses	DMP4800E	Individual Study		Winter through Summer	10	10
II Recommended Courses	DMP2000E	Disaster Management Policies A: from Regional and Infrastructure Aspect	HIBINO Naohiko	Fall	2	
	DMP2010E	Disaster Management Policies B: from Urban and Community Aspect	KATAYAMA Koji	Fall	2	
	DMP2800E	Hydrology	MIYAMOTO Mamoru, KOIKE Toshio	Fall through Winter	2	
	DMP2810E	Hydraulics	HARADA Daisuke, EGASHIRA Shinji	Fall through Winter	2	
	DMP2820E	Basic Concepts of Integrated Flood Risk Management (IFRM)	TAKEUCHI Kuniyoshi	Fall through Winter	2	
	DMP2870E	Urban Flood Management and Flood Hazard Mapping	TANAKA Shigenobu	Fall through Winter	2	
	DMP3810E	Flood Hydraulics and River Channel Design	FUKUOKA Shoji	Fall through Winter	2	
	DMP3820E	Mechanics of Sediment Transportation and Channel Changes	EGASHIRA Shinji	Fall through Winter	2	
	DMP3840E	Control Measures for Landslide & Debris Flow	OSANAI Nobutomo	Fall through Winter	2	
	DMP2900E	Socio-economic and Environmental Aspects of Sustainability-oriented Flood Management	OHARA Miho, SUMI Tetsuya	Fall through Winter	2	
III Elective Courses	DMP1800E	Computer Programming	USHIYAMA Tomoki, HARADA Daisuke	Fall through Winter	1	
	DMP2890E	Practice on Integrated Flood Analysis System(IFAS)	SAYAMA Takahiro, RASMY Mohamed	Fall through Winter	1	
	DMP3802E	Practice on GIS and Remote Sensing Technique	RASMY Mohamed KAWASAKI Akiyuki	Fall through Winter	1	
	DMP3900E	Site Visit of Water-related Disaster Management Practice in Japan	KOIKE Toshio	Fall through Summer	1	
	DMP3910E	Practice on Open Channel Hydraulics	YOROZUYA Atsuhiro	Fall through Spring	1	
	*	Selected Topics in Policy Studies I -IV				

Notes:

1. Graduation Requirements: Students must complete a minimum of 30 credits, 10 of which must come from Category I and 16 of which must come from Category II.
2. Courses offered in the Program are subject to change.
3. * Course Number, Instructor, and Term for the course will be announced later when the course is offered.

区分 III 選択科目		上記以外の授業科目			
区分 X その他		プロフェッショナル・コミュニケーションセンター開講科目			

備考

1 修了要件
次の①及び②に示す要件を満たし、合計31単位(区分Xに属する科目の単位を除く。)以上を履修するとともに、特定の課題についての研究成果の審査に合格し、かつ、最終試験に合格すること。

① 区分 I 22単位

② 区分 II 9単位以上

2 授業科目は、年度途中で追加開設・変更される場合がある。

3 GOV2200EAとGOV2200EBはいずれか一方を履修することができる。

4 授業内容が同じである日本語の授業科目と英語の授業科目の両方を履修した場合は、いずれか一方の単位を修了に必要な単位としてカウントする。

Certificate in Data Science for Policy Studies

I. Overview

To encourage GRIPS students to take data science-related courses, GRIPS established a Certificate System in Data Science (DS) for Policy Studies.

II. DS Certificate Requirements

Under the certification system, students who fulfill all of the following requirements will be awarded a DS certificate.

1. Two (or more) credits for courses among the following data science basic/core courses:

- Introduction to Data Science
- Data Science in Practice
- Data Science for Public Policy

(We offer four other courses in Japanese.)

2. Ten (or more) credits (for five two-credit courses) for data science-related courses (please refer to “List of DS-related Courses”), including those listed above.

*The procedures for applying for a certificate and other notes will be provided separately.

DS関連科目群リスト/ List of DS-related Courses

As of August 10th, 2023

Course Number	Courses	Instructor	Term	Credit
MOR1000E	Introduction to Quantitative Methods	MOROHOSI Hozumi	Fall	2
*MOR1030E	Introduction to Data Science	TSUCHIYA Takashi	Fall(Session I)	2
*MOR2020E	Data Science in Practice	TAKENOUCHI Takashi	Fall (Session II)	2

UPP3280J	事業評価手法	城所 幸弘、岡本 亮介、細江 宣裕	夏	2
GOV6930J	社会科学方法論=量的分析 (Social Science Methodology for Quantitative Analysis)	MASUYAMA Mikitaka	Fall	2
STI2030J	ビブリオメトリクスとその応用	林 隆之	隔年春	2
STI2250J	計量分析演習	鈴木 潤	秋前	2
STI7031J	ビブリオメトリクスとその応用	HAYASHI Takayuki	Biyearly Spring	2
STI7251J	計量分析演習	SUZUKI Jun	Fall (Session I)	2

※1 “*”を付した科目はデータサイエンス基幹的・基礎的科目。
Courses with “*” are data science basic/core courses.

※2 開講学期の変更や開講しない場合がある。

The term of a course may be changed or it may not be offered.

※3 修了直前の夏学期または冬学期の科目は、成績評価のスケジュールの都合上、DS認定証授与要件には含まれない場合があるので注意すること。

Note that data science related courses completed in the summer or winter term immediately before completion may not be registered at the time of certificate judgement, due to the timing of grading.
