Growth Policy Formulation

Can East Asia Teach Anything to Africa?

Kenichi Ohno (GRIPS)
March 2008

High Performance (on average)

East Asia achieved high average growth in recent decades

Per Capita GDP
(Measured in 1990 international Geary-Khamis dollars)
**Per Capita GDP in 2004 (PPP)**

*World Bank data*

**Diversity in Political and Economic Development**

High correlation (0.90) but causality cannot be argued from this diagram

Only circled economies participate in regional dynamism

Sources: Compiled from World Bank, Worldwide Governance Indicators, Sep. 2006; and World Bank, World Development Indicators, 2006.
Different Speed of Catching Up

Per capita real income relative to US
(Measured by the 1990 international Geary-Khamis dollars)

Wrong Lessons from East Asia

- **WRONG:** Mindless copy of a policy adopted by some E. Asian country in the past (ex. postal savings, heavy industry drive, Green Revolution, etc)
- **WRONG:** Strong government should direct private sector activities (In East Asia, private dynamism informed and led policy direction)
- **WRONG:** An authoritarian state is needed for economic take-off (research on “Democratic developmentalism”—can we have development without a dictator?)
Development and Aid Strategy

There is a clear difference in developmental orientation between Eastern practitioners and Western aid community.

Learning Industrial Policy Formulation

- Political will and national obsession (not just “ownership”)
- Pursue growth policies and social policies (separable)
- Vision → goals → action plans
- Field-based pragmatism, attention to details
- A permanent process for continuously setting goals and action plans

→ General ideas and methods for designing unique policies for each country
Why Eastern Way Is Hard to Convey to Others

- Emphasis on local diversity
  No manuals or policy matrix; no answer available immediately
- Emphasis on doing rather than talking/writing/advocating
  Lack of PR and framework, respect for quiet action
- Language barrier
  Internal reports in Japanese only

Our Proposal for Japan’s New Aid in Africa

- Japan should concentrate additional aid on a few African countries with:
  - Strong political will (top leader)
  - Social and macroeconomic stability
  - Sufficient administrative mechanism
- Initiate policy dialogue for formulating concrete growth strategy
- Mobilize available aid tools for executing agreed strategy
- Involve private sector and other donors

ODA Manifesto by the Group for Renovating Japanese ODA (2007)

**Proposal 27**—Expand ODA for Africa, especially grants.

**Proposal 28**—Establish a committee to specialize in supporting Africa.

**Proposal 29**—Select model countries for “aid for graduation” and concentrate resources.

**Proposal 30**—Design special facilities to mitigate risks and promote private investment in Africa.
JICA-JBIC Report in Progress

Establish “Industrialization Strategy” as a process, not just a document.

1. Identify desired vision, economic structure, and positioning in global value chain.
2. Through public-private dialogue, discover growth-leading industries for future.
3. Identify their constraints (infra, HRD, etc).
4. Devise measures to remove constraints and promote targeted industries.

Measures must be consistent with the country’s institutional capability and executed under discipline and competition.

Japan’s Development Dialogue in East Asia

- Vietnam – Ishikawa Project (policy research and dialogue among academics, officials & consultants, 1995-2001)
- Laos – Hara Project (overall development strategy, 2000-05)
- Thailand – Mizutani Report for upgrading SMEs and supporting industries (1999)
Can We Replicate This in Africa? The Case of Zambia

- JICA is conducting the “Triangle of Hope” Project 2006-09 (improving investment climate) mobilizing a Malaysian consultant under new methodology.
- As a next step, Zambia wants Japan to help formulate a long-term industrial strategy.

Our Suggestion for Zambia’s Next Steps

- Precondition – forming a strong super-secretariat under President
- First stage (1 year preparation) -- industry surveys, studying East Asian experiences, receiving experts, seminars, website, produce Basic Issues Report
- Second stage (2 years) – drafting Industrialization Strategy with JICA support

- Top leader’s strong commitment is critical
- Mainstreaming of this project among donors and in Tokyo
