An overview of EBSCO Discovery Service(EDS)
What is EBSCO Discovery Service (EDS)?
— all-inclusive search solution that makes in-depth research easy.

EBSCO Discovery Service (EDS) provides you with access to various research resources via a single entry point. Features and functionality include:

- **Sophisticated Search** — Rich metadata and superior relevance ranking technology
- **Direct Access to Full Text** — One-click access directly through the results list
- **Intuitive Interface** — Features and technology built on user research
How to access - go to library website (on campus)

Click ‘GRIPS Discovery Service’ tab, enter keywords and click on ‘search’. Or you can access to EDS via ‘GRIPS Discovery Service’ in ‘Search & Find’ menu.
Off-Campus Access via VPN

How to search, refine search, view results and records in EDS
Enter your search terms and the responsive auto-complete will appear with popular customer search terms as well as Publications (e-journals and ebooks) found in your library's holdings, choose from this selection or click the **Search** button.
EBSCO research interfaces allow users to conduct advanced searches using various search options, which assist you in creating a more targeted search.
If a Research Starter is available for your search term, it will appear at the top of the search results list. Designed to enhance the research experience, Research Starters include links to relevant articles, images, videos, and audio clips. The content is curated from a variety of high quality sources including Salem Press, Encyclopedia Britannica, and others.

Simply click the ‘More’ link for a topic overview.
If your search terms exactly match with e-journals in Publication Finder, **Publication Finder Exact Match Placard** will appear at the top of the search results list. It includes link to detailed record and keyword box to search for articles within the publication.
The Result List Screen has three columns:

- **Left** - Refine Search
- **Middle** - Results Display
- **Right** - Related Information

You can hide or show the different areas by clicking the control arrows at the top of the left and right columns. Your library administrator decides whether the facets in the left column are displayed.
If you are looking to refine your search from the Result List, you can apply limiters under **Limit To** or use the available **facets** (such as Source Type, Subject, and Geography) all found in the left column. Click the **Show More** link when displayed to view all available options.
When refining your search results using limiters, source types, and facets, each item is added to the **Current Search** box found at the top of the left-hand column. Clicking on a hyperlinked subject term within Current Search executes a search for that term only. Clicking on the **X** icon removes the term from Current Search and refreshes your search results.
On your results list, select an article to read by clicking on the full text link. You can view the **Detailed Record** by clicking the article title, or view a brief version of the record by holding your mouse over the preview icon.
The Detailed Record includes an article’s citation information and links to full text, when available. You can print, email, save, cite or export a single result using the tools in the right column of the Detailed Record.
Collect and store items by adding Discovery Service results to your My EBSCOhost folder. Results from Discovery Service Partner Databases will be stored in the Articles area of the folder.

For further information on how to create My EBSCOhost account, please see ‘Creating My EBSCOhost’ section starting from page 42.
‘E-Journals/E-Books’ is a state-of-the-art knowledge base search service for locating publications in your institution’s collection, regardless of publisher or provider.

EDS Relevance Matching Priorities

-How is relevance ranking determined in EDS?- 

The system has the following priorities and has no bias toward content from any provider:

1. **Match on subject headings** from controlled vocabularies 
2. **Match on article titles**
3. **Match on author keywords**
4. **Match on keywords within abstracts**
5. **Match on keywords within full text**

**Exact Matches:** Exact matches are favored over partial matches – considering also the field in which those words appear (abstract vs. full text vs. title, etc.)

**Density:** Matches across multiple metadata fields are favored for relevance scoring (more is better). The scoring influence of repeat terms within individual metadata fields is minimized.
Value Ranking:

Recency / Currency
Recently published content is scored higher for relevance than older content
Value Ranking:

Document Type

Certain document types are weighted higher than others for relevance scoring, for example:

“Review articles” are considered valuable

“Book reviews” are not considered valuable

If the word “book” or “review” is not searched, there is a “bias” against book reviews, so these don’t dominate results
Value Ranking:

**Document Length**

Documents of a more substantial length have a heavier weighting.

(e.g., a ¼ page article is considered less valuable than a 4 page research paper)
An overview of EBSCOhost
What is EBSCOhost?
— a powerful online reference system accessible via the Internet.

- It offers a variety of proprietary full text databases and popular databases from leading information providers.

- The comprehensive databases range from general reference collections to specially designed, subject-specific databases for public, academic, medical, corporate and school libraries.
Academic Search Premier contains indexing and abstracts for more than 8,600 journals (nearly 7,400 Peer-Reviewed Journals), with full text for more than 4,600 of those titles (nearly 3,900 Peer-Reviewed Journals).

Academic Search Premier contains unmatched full-text coverage in biology, chemistry, engineering, physics, psychology, religion & theology, etc.
the American Economic Association's electronic database, is the world's foremost source of references to economic literature.

• This database contains more than one million records, with citations and abstracts dating back to 1886. Adhering to the high-quality standards long recognized by subscribers to the Journal of Economic Literature (JEL) this American Economic Association's electronic database is a reliable source for economic research citations and abstracts.

Choose Databases

To search within a single database, click the database name listed below. To select more than one database to search, check the boxes next to the databases and click Continue.

---

**EconLit**

_EconLit_, the American Economic Association's electronic database, is the world's foremost source of references to economic literature. The database contains more than 1.1 million records from 1886-present. _EconLit_ covers virtually every area related to economics.

More Information

---

**Academic Search Premier**

This multi-disciplinary database provides full text for more than 4,600 journals, including full text for nearly 3,900 peer-reviewed titles. PDF backfiles to 1975 or further are available for well over one hundred journals, and searchable cited references are provided for more than 1,000 titles.

Title List  More Information

---

**eBook Collection (EBSCOhost)**
Keyword Search – Enter a keyword or phrase to search, and click on the Search button.
Click on the drop down menus to the right of the search boxes to limit your searching to specific fields (e.g.: document/article title, journal title, author, subject, etc.)
Boolean Operators

- **AND** is used between keywords to narrow your search
  - *travel and Europe* will retrieve references containing both search terms

- **OR** is used between keywords to broaden your search
  - *college or university* will retrieve references containing either search term

- **NOT** is used to omit a keyword from your search
  - *cancer not smoking* will retrieve references containing the term cancer, but that do not contain the term smoking
Search Tips

• The truncation/word stemming device is the asterisk (*)
  – econom* will retrieve economic, economy, etc

• The single character wildcard is question mark (?)
  – organi?ation will retrieve organisation or organization

Subject Terms: *ECONOMIC equilibrium
*POLITICAL corruption
*FISCAL policy
*TAX rates
*TAX evasion

NAICS/Industry Codes:
921130 Public Finance Activities

Abstract: This study uses a dynamic general equilibrium model to quantify the effects of corruption and tax evasion on fiscal policy and economic growth. The model is calibrated to match estimates of tax evasion in developing countries. The calibrated model is able to generate reasonable predictions for net tax rates, the corruption associated with public investment projects, and the negative correlation between corruption and tax revenue. The presence of corruption and evasion is shown to have significant, but not large, negative effects on economic growth. The relatively moderate effects help explain the absence of a robust negative correlation between growth and corruption in cross-country data. The model also implies that cracking down on tax evasion before addressing corruption can be a bad idea and that higher wages for public officials can improve...
You can do the following using the reference tools provided in the detailed record page:

- **Add to Folder** to store the article in the My EBSCOhost folder in order to print/save/email multiple references at once.
- **Print** the reference.
- **Email** the reference – if EBSCOhost provides the full text for the article, the full-text will be attached to the email.
- **Save** the reference.
- **Cite** the reference in various different referencing styles, including APA
- **Export** the reference to a bibliographic management solution, such as EndNote, RefWorks or Zotero.
- **Create a Note** about the reference to store in the My EBSCOhost folder.
- **Retrieve a Permalink** to the reference – a persistent URL you can embed in an email, a web-page, or to save to your bookmarks.
Using the My EBSCOhost Folder

Click Folder icon to add items you are interested in to the folder for use later in your search session.

If you have a personal My EBSCOhost account, you have your own personal area (folder) to collect and store information for future reference.
Creating
My EBSCOhost
Creating a new My EBSCOhost account

Click on the Create a new account link, fill in the fields, and click Submit. Once your information has been accepted, you will automatically be logged in as a personalized folder user.
Saving Items to the My EBSCOhost Folder

You can view the contents of your My EBSCOhost folder. Your folder contains links to your saved items in groups such as Articles, Images, Journal Alerts, Saved Searches, etc.
The custom folder feature provides the ability to create numerous folders, each on a particular topic, in which various results can be sorted and stored.

You can customize the name of each folder and determine which folders nest within other folders, to maximize efficiency when managing saved items.
Search Alerts save valuable research time, and can be set up to provide automatic e-mail notification whenever new results related to topics of interest become available in EBSCOhost.
Complete the Alert setup form selecting from the Frequency and Results Format drop-down lists. Enter the email address(es) to which you want your future search results sent, and then click Save Alert.
Journal Alerts allow you to set up automatic e-mail notification when a new issue of a specific journal becomes available in an EBSCOhost database.
