

List of Principal Publications

Articles

1. Ogawa, H. and Oyama, T., 1973. "Optimal construction planning of electric power generation plants by applying mixed-integer programming technique", *Review of Electricity Economics*, Central Research Institute of Electric Power Industry, No.3, 1973-7, pp.93-109 (in Japanese).
2. T. Oyama, 1977; "On the Completion of Partial Latin Squares", Ph.D Thesis, Technical Report No.326, School of Operations Research and Industrial Engineering, Cornell University, Ithaca, New York, U.S.A.
3. F.R. Giles, T. Oyama and L.E. Trotter, Jr., 1977; "On Completing Partial Latin Squares", Technical Report No.335, School of Operation Research and Industrial Engineering, Cornell University, Ithaca, New York, U.S.A., also appeared in the *Proceedings of the Eighth Southeastern Conference on Combinatorics, Graph Theory and Computing*, Louisiana State University.
4. T. Oyama, 1978; "Necessary Conditions for the Completion of Partial Latin Squares", *Journal of Operations Research Society of Japan*, Vol.21, No.1, pp.109-123.
5. H. Ogawa and T. Oyama, 1978; "Applications of operations research techniques for long-term forecasting of the power system", *Communications of Operations Research*, Operations Research Society of Japan, Vol.23, No.10, pp.599-604 (in Japanese).
6. Ogawa, H. and Oyama, T., 1978. "Long-term forecasting of electricity as an energy resource and application of OR", *Communications of Operations Research*, Operations Research Society of Japan, Vol.23, No.10, pp.599-604 (in Japanese).
7. T. Oyama, 1979; "On the computational complexity of combinatorial problems", *Communications of Operations Research*, Operations Research Society of Japan, Vol.24, No.7, pp.427-433 (in Japanese).
8. Nishino, Y., Tomita, T. and Oyama, T., 1979. "Measuring long-term marginal costs and electric tariff problem", *Review of Electricity Economics*, Central Research Institute of Electric Power Industry, No.14, 1979, pp.1-23 (in Japanese).
9. Oyama, T., 1979. "Simulation for management – LP model analysis for

- generating investment plan in the electric power utilities”, *Denki Hyoron* (Electricity Critique), Denki Hyoron Publishing Company, No.7, pp.703-704 (in Japanese).
10. T. Morikiyo and T. Oyama, 1980; "Energy model analyses and energy conservation", *Communications of Operations Research*, Operations Research Society of Japan, Vol.25, No.6, pp.365-374 (in Japanese).
 11. F.R. Giles, T. Oyama and L.E. Trotter, Jr., 1980; "Related Necessary Conditions for Completing Partial Latin Squares", *Journal of Combinatorial Theory (A)*, Vol.29, No.1, pp.20-31.
 12. Oyama, T., 1980. "Resource-oriented decomposition technique for the mathematical programming", *Kompyuta Saiensu* (Computer Science), Special issue of bit journal, No.11, pp.188-190 (in Japanese).
 13. T. Oyama, 1981-1982; "Introduction to matroid theory", 11 article lecture series, *Communications of Operations Research*, Operations Research Society of Japan, Vol.26, pp.399-404, pp.470-476, pp.547-552, pp.663-669, pp.729-734, Vol.27, pp.42-45, pp.112-117, pp.167-172, pp.229-235, pp.296-302, pp.359-364 (in Japanese).
 14. T. Oyama, 1982; "On the min-max relations of mathematical programming models", *Proceedings of the 17th SSOR*(Summer Seminar on Operations Research), pp.17-23 (in Japanese).
 15. T. Oyama, 1983; "Survey ----- model analyses for energy problems", *Simulation*, Simulation society of Japan, Vol.2, No2, pp.77-87 (in Japanese).
 16. T. Oyama, 1983; "On the stability of Japan's energy system", *Research Series of Economic Research Institute*, Economic Planning Agency, No.40, pp.117-164 (in Japanese).
 17. T. Oyama, 1983; "Primary energy consumption in Japan ----- translog model approach", *Research Series of Economic Research Institute*, Economic Planning Agency, No.40, pp.232-266 (in Japanese).
 18. T. Oyama, 1983; "Applying Mathematical Programming to Measure Electricity Marginal Costs", *IEEE Transactions on Power Apparatus and Systems*, Vol.PAS-102, No.5, pp.1324-1330.
 19. Oyama, T., 1983. "Visiting Indonesia", *Communications of Operations Research*, Operations Research Society of Japan, Vol.28, No.3, pp.138-139 (in Japanese).
 20. Oyama, T., 1984. "Optimization problems and computer", *Sai-Com*

- (Saitama University Computer News), Saitama University, Vol.8, pp.15-16 (in Japanese).
21. T. Oyama, 1986; "A Mathematical Programming/Economic Equilibrium Model for the Quantitative Analysis of the Stability of Japan's Energy System", MIT EL 86-016WP, M.I.T., U.S.A.
 22. T. Oyama, 1987; "Mathematics of political district apportionment problems", *Communications of Operations Research*, Operations Research Society of Japan, Vol.32, No.5, pp.269-280 (in Japanese).
 23. T. Oyama, 1987; "Comparative analysis of apportionment methods applied to Japan's political constituencies", *Communications of Operations Research*, Operations Research Society of Japan, Vol.32, No.8, pp.551-561 (in Japanese).
 24. T. Oyama, 1987; "Theoretical Aspects of an Electricity Marginal Cost Model", *IEEE Transactions on Power Systems*, Vol.PWRS-2, No.2, pp.413-421.
 25. T. Oyama, 1987; "Outline of an energy/CO₂ combined model", Research on Socio-economic Aspects of Energy Systems, in the Reports of Special Project Research on Energy under Grant in Aid of Scientific Research of the Ministry of Education, Science and Culture, Japan, pp.137-142.
 26. T. Oyama, 1987; "On the Application of System Optimization Techniques", Electronic Data Processing for Government Information Activities, Bureau of Administrative Management, General Affairs Agency.
 27. T. Oyama and S. Han-i, 1987; "Application of Discrete Optimization Techniques to Train Scheduling Problems", *Asia-Pacific Journal of Operational Research*, 4, pp.158-186.
 28. T. Oyama, 1989; "A Mathematical Programming/Economic Equilibrium Model for the Quantitative Analysis of the Stability of Japan's Energy System", *Asia-Pacific Journal of Operational Research*, Vol.6, No.1, pp.13-45.
 29. T. Oyama, 1989; "The apportionment problem", *Communications of Operations Research*, Operations Research Society of Japan, Vol.34, No.7, pp.302-304 (in Japanese).
 30. T. Oyama, 1989; "Linear programming", *Sugaku Seminar* (Mathematics Seminar), Vol.28, No.2, pp.26-28 (in Japanese).
 31. T. Oyama, 1991; "On a parametric divisor method for the

- apportionment problem", *Journal of Operations Research Society of Japan*, Vol.34, No.2, pp. 187-221 .
32. T. Oyama and A. Taguchi, 1992; "Shortest path counting problem and congestion of traffic road segments", *PAT(Perspectives on Advanced Technology Society) News*, No.20, pp. 13-19(in Japanese).
 33. T. Oyama and A. Taguchi, 1993; "Theoretical results on the shortest path counting problem", Research on mathematical evaluation methods for gain and loss of concentration-diversification of city functions", Research Report for Grant-in-Aide for Scientific Research by the Ministry of Education (ed. M. Fushimi), Perspectives on Advanced Technology Society, Ministry of Education, pp.93-127.
 34. T. Oyama and A. Taguchi, 1993; "Shortest path counting problem and congestion of traffic road segments", Research on mathematical evaluation methods for gain and loss of concentration-diversification of city functions", Research Report for Grant-in-Aide for Scientific Research by the Ministry of Education (ed. M. Fushimi), Perspectives on Advanced Technology Society, Ministry of Education, pp. 81-92 (in Japanese).
 35. A. Taguchi and T. Oyama, 1993; "On evaluating the importance of traffic road segments with network-type structure --- application to city road network in metropolitan area", Research on mathematical evaluation methods for gain and loss of concentration-diversification of city functions", Research Report for Grant-in-Aide for Scientific Research by the Ministry of Education (ed. M. Fushimi), Perspectives on Advanced Technology Society, Ministry of Education, pp.143-184 (in Japanese).
 36. A. Taguchi and T. Oyama, 1993; "On evaluating the importance of traffic road segments with network-type structure --- application to city road network in metropolitan area", *Communications of Operations Research*, Operations Research Society of Japan, Vol.38, No.9, pp.465-470 (in Japanese).
 37. T. Oyama, 1993; "Mathematics for election voting system --- problems in single man voting system and proportional representative system", *Communications of Operations Research*, Operations Research Society of Japan, Vol.39, No.1, pp.39-44 (in Japanese).
 38. T. Oyama, 1994; "International impacts of environmental tax ---

- investigation of the effects to the carbon leakage", Research report on international impacts of environmental tax (ed. T. Yakushiji), Association of Financial Economy, pp.81-91, pp.120-133 (in Japanese).
39. H. Kawate and T. Oyama, 1994; "Space interaction model analyses of interregional telephone call flow phenomena", *Communications of Operations Research*, Operations Research Society of Japan, Vol.37, No.2, pp.114-132 (in Japanese).
 40. H. Takasakura and T. Oyama, 1994; "Optimization of collection and transportation system of city wastes", *Communications of Operations Research*, Operations Research Society of Japan, Vol.39, No.12, pp.653-658 (in Japanese).
 41. T. Oyama, 1994; "Study on theory and application of apportionment methods", Research Report for Grant-in-Aide for Scientific Research by the Ministry of Education, pp.143-184 (in Japanese).
 42. A. Taguchi and T. Oyama, 1995; "Allocation of urban space between roads and residential area", Research on mathematical evaluation methods for gain and loss of concentration-diversification of city functions", (ed. M. Fushimi), Perspectives on Advanced Technology Society, Ministry of Education, pp. 21-32 (in Japanese).
 43. H. Takasakura and T. Oyama, 1995; "Applying network model approaches to optimize city waste collection and transportation systems", Research Report for Grant-in-Aide for Scientific Research by the Ministry of Education (ed. M. Fushimi), Perspectives on Advanced Technology Society, Ministry of Education, pp.83-107 (in Japanese).
 44. T. Kanamori and T. Oyama, 1995; "Multi-factor entropy model analyses for inter-city consumers movement flow", Research Report for Grant-in-Aide for Scientific Research by the Ministry of Education (ed. M. Fushimi), pp.125-157 (in Japanese).
 45. T. Oyama, 1995; "Location decision model and related problems", Optimization : Modelling and Algorithm 6, Mathematical Statistics Research Institute, pp.123-134 (in Japanese).
 46. T. Oyama and A. Taguchi, 1995; "Weight of shortest path analyses for the shortest path problem", *Proceedings of APORS'94*, M. Fushimi and K. Tone (eds.), World Scientific, Singapore, pp.53-62.
 47. A. Taguchi and T. Oyama, 1995; "Allocation of urban space between roads and residential area", *Proceedings of APORS'94*, M. Fushimi and

- K. Tone (eds.), World Scientific, Singapore, pp.97-104.
48. T. Oyama and T. Ichimori, 1995; "On the Unbiasedness of the Parametric Divisor Method for the Apportionment Problem", *Journal of Operations Research Society of Japan*, Vol.38, No.3, pp.301-321.
 49. M. Hata and T. Oyama, 1995; "Application of hierarchical mathematical programming model for the optimal facility location problem of the aged", *Proceedings of the RAMP Symposium '95*, Mathematical Programming Research Group, Operations Research Society of Japan, pp.91-106 (in Japanese).
 50. T. Oyama, 1995; "Outline and implementation of mathematical programming model analyses", *Operations Research Seminar Text*, Operations Research Society of Japan, pp.1-13 (in Japanese).
 51. T. Oyama, 1996; "Model for production planning", *Communications of Operations Research*, Operations Research Society of Japan, Vol.41, No.3, pp.166-169 (in Japanese).
 52. T. Oyama and A. Taguchi, 1996; "Application of the shortest path counting problem to evaluate the importance of city road segments in Japan", *Perspectives of Advanced Technology Society 3 : Urban Life and Traffic*, Y. Matsuda and M. Fushimi (eds.), Maruzen Planet Co., Tokyo, Japan, pp.3-20.
 53. A. Taguchi and T. Oyama, 1996; "Allocation of urban space between roads and residential area", *Perspectives of Advanced Technology Society 3 : Urban Life and Traffic*, Y. Matsuda and M. Fushimi (eds.), Maruzen Planet Co., Tokyo, Japan, pp.55-64.
 54. T. Oyama, 1996; "Optimizing city waste collection and transportation systems via the application of network model approaches", *Perspectives of Advanced Technology Society 3 : Urban Life and Traffic*, Y. Matsuda and M. Fushimi (eds.), Maruzen Planet Co., Tokyo, Japan, pp.21-36.
