

Overview of the Master's Program

Fundamental Objectives

The fundamental objectives of the master's programs at GRIPS are to develop the following human resources:

1. Practitioners equipped with practical professional knowledge, ability to analyze policies in accordance with academic disciplines, and make policy recommendations
2. Researchers in the field of policy studies with basic research skills

Educational Goals

The master's programs at GRIPS are designed to provide education to enable students to develop the following skills over the course of one to two-year study period:

- (a). Basic research skills in policy studies based on educational methods that meet the international standard;
- (b). Skills in disciplines required for policy studies; and
- (c). Skills that enable students to write a master's thesis or policy paper in the field of social sciences.

Established Programs

There are nine programs conducted in English, three programs conducted in Japanese and one program conducted in both Japanese and English under the GRIPS master's programs. For details, please refer to "*Summary Table of Master's Programs*" and "*Graduation Requirements*".

Summary Table of Master's Programs

Program		Standard Duration	Summary
Commence in Fall conducted in English	Young Leaders Program (School of Government/School of Local Governance)	1 year	Designed for future national leaders of countries in Asia and other regions
	One-year Master's Program of Public Policy (MP1)	1 year	Designed primarily for mid-career professionals and staff members in local or national governments and international organizations, to provide them with the basic skills and knowledge required for policy analysis and policy management
	Two-year Master's Program of Public Policy (MP2)	2 years	Designed primarily for early- and mid-career professionals and staff members in local or national governments, international organizations, and research institutes with the aim of equipping them with the technical skills for analyzing, designing, and implementing public policy
	Macroeconomic Policy Program (One-year Program, Two-year Program)	1 year / 2 years	Designed for policy makers and professionals using modern macroeconomic theory and policy
	Public Finance Program	1 year	Designed for fiscal leaders in taxation and customs
	Economics, Planning and Public Policy Program (Indonesia Linkage Program)	1 year	Designed to enable government officials to contribute to good governance and economic development in Indonesia
	ASEAN Initiatives Program	1 year	Designed for young ASEAN administrators to contribute to ASEAN's regional integration and friendly relations between Japan and ASEAN.
	Disaster Management Policy Program	1 year	Designed for disaster risk management experts from developing countries
	Maritime Safety and Security Policy Program	1 year	Designed for future leaders of the coast guard organizations in the Indo-Pacific and other regions.
	Strategic Studies Program	1 year	Designed to provide practitioners with the expertise they require to assume responsibility for the formulation and implementation of policy related to security and defense
Commence in Fall, conducted in both Japanese and English	Public Policy Program		
	Regional Policy Concentration	1 year	Designed for local government officials who take a lead in analyzing and solving regional problems
	Infrastructure Policy Concentration	1 year / 1 year and 3 months	Designed for professionals in the field of infrastructure policy
	Disaster Risk Management Concentration	1 year	Designed for government officials and staff of public and private organizations who are or will be involved in disaster risk management
	Healthcare Policy Concentration	1 year	Designed for future leaders in the fields of healthcare and relevant issues
	Agricultural Policy Concentration	1 year	Designed for local government officials and other experts in the field of agricultural policy planning
	Science, Technology and Innovation Policy Concentration	1 year	Designed to provide government officials and practitioners with the skills they need to plan, draft, implement, evaluate and revise policies and strategies using scientific approaches
	International Cooperation Concentration	1 year	Designed for leaders in international cooperation
	Urban Policy Concentration	1 year	Designed for future leaders in urban policy
	Open Concentration	1 year	Designed for public administrators and researchers Note: Extensive knowledge of policy analysis is required.
	Science, Technology and Innovation Policy Program	2 years	Designed to foster both a) skilled professionals who can plan, draft, implement, evaluate and revise science and technology innovation policy and strategies using scientific approaches; and b) well-prepared Ph.D. entrants who aim to become researchers
	Global Leadership Development Program	2 years	Designed to (a) provide government, industry, and media personnel with the diplomatic, analytical, and communication skills required to fully understand global political and economic issues, and (b) prepare them to lead organizations in competitive international affairs

Graduation Requirements

Program	Credit Requirement	Thesis Requirement	Degree
Young Leaders Program	<p>(School of Government) Students must complete a minimum of 30 credits, of which 11 must come from Category I, 8 from Category II, and the rest from Categories II and/or III of the Young Leaders Program (School of Government) curriculum.</p> <p>(School of Local Governance) Students must complete a minimum of 30 credits, of which 15 must come from Category I, 6 from Category II, and the rest from Categories II and/or III of the Young Leaders Program (School of Local Governance) curriculum.</p>	<p>(School of Government) (School of Local Governance) Students must produce a paper on a topic in their area of independent study and submit it in the prescribed format. They must also give a presentation of the content of the paper. The Program Director will provide guidance in this matter.</p>	Master of Public Administration Master of Public Policy
One-year Master's Program of Public Policy (MP1)	Students must complete a minimum of 31 credits, of which 1 must come from Category I and the rest from Category II and III of the One-year Master's Program of Public Policy (MP1) curriculum.	Students must produce a policy paper and submit it in the format prescribed by the concentration to which they belong. The concentration leaders will provide guidance in this matter.	Master of Public Policy
Two-year Master's Program of Public Policy (MP2)	Students must complete a minimum of 41 credits, of which 1 must come from Category I and the rest from Category II and III of the Two-year Master's Program of Public Policy (MP2) curriculum.	Students must produce a policy paper and submit it in the format prescribed by the concentration to which they belong. The concentration leaders will provide guidance in this matter. In the second year, students must produce a thesis on the topic of their choice and submit it in the prescribed format.	Master of Arts in Public Policy
Macroeconomic Policy Program (One-year Program)	Students must complete a minimum of 30 credits, of which 13 must come from Category I, 12 from Category II, and the rest from Category II and/or III of the Macroeconomic Policy Program (One-year Program) curriculum.	Students must produce a paper on a topic in their area of independent study and submit it in the prescribed format. They must also give a presentation of the content of the paper. The Program Director will provide guidance in this matter.	Master of Public Policy Master of Public Economics
Macroeconomic Policy Program (Two-year Program)	Students must complete a minimum of 36 credits, of which 13 must come from Category I, 16 from Category II, and the rest from Categories II and/or III of the Macroeconomic Policy Program (Two-year Program) curriculum.	Students must produce a thesis and submit it in the prescribed format, and give a presentation on the thesis. The Program Director will provide guidance in this matter.	Master of Arts in Public Economics

4. Degree Programs for Master's Students

Program	Credit Requirement	Thesis Requirement	Degree
Public Finance Program	<p>Students are required to complete a minimum of 32 credits, of which a portion must come from designated courses in Category I, while the remainder should be taken from Category III and X of the PF program curriculum.</p> <p>A. Tax scholars must complete the following practicum courses in Category I: PFP2520E and PFP5010E.</p> <p>B. Customs scholars must complete the following practicum courses in Category I: PFP5110E, PFP5120E, PFP5130E, and PFP5210E.</p> <p>Both Tax and Customs scholars must complete the following Category I courses: ECO1000EB, ECO3100E, ECO4130E, and GEN5020E.</p>	<p>Students are required to produce a policy paper on a topic related to their respective streams, with the guidance of a supervisor. Additionally, they must deliver a presentation on the policy paper and submit the final version in the prescribed format. The Program Director will provide guidance in this regard.</p>	Master of Public Finance
Economics, Planning and Public Policy Program (Indonesia Linkage Program)	<p>Students must complete a minimum of 30 credits, of which 1 must come from Category I and the rest from Categories II and/or III of the Economics, Planning and Public Policy Program curriculum and others.</p>	<p>One requirement for the master's degree is the submission of a research paper on a specific topic. The independent study advisor and the topic will be determined through discussion with the Program Committee.</p>	Master of Public Policy
ASEAN Initiatives Program	<p>Students must complete a minimum of 30 credits, of which 16 must come from Category I, 6 from Category II, and the rest from Categories II and/or III of the ASEAN Initiatives Program curriculum.</p>	<p>Students must produce a paper on a topic in their area of independent study and submit it in the prescribed format. They must also give a presentation of the content of the paper. The Program Director will provide guidance in this matter.</p>	Master of Public Policy
Disaster Management Policy Program	<p>(Seismology, Earthquake Engineering and Tsunami Disaster Mitigation)</p> <p>Students must complete a minimum of 30 credits, of which 10 must come from Category I, 6 from Category II, and the rest from Categories II and/or III of the Disaster Management Policy Program (Seismology, Earthquake Engineering and Tsunami Disaster Mitigation) curriculum.</p> <p>(Water-related Disaster Management)</p> <p>Students must complete a minimum of 30 credits, of which 6 must come from Category I, 16 from Category II, and the rest from Categories II and/or III of the Disaster Management Policy Program (Water-related Disaster Management) curriculum.</p>	<p>One requirement for the master's degree is the submission of a research paper on a specific topic. The topic will be determined through discussion with the teaching staff.</p>	Master of Disaster Management

Program	Credit Requirement	Thesis Requirement	Degree
Maritime Safety and Security Policy Program	Students must complete a minimum of 30 credits, of which 22 must come from Category I, 8 from Category II, and the rest from any category of the Maritime Safety and Security Policy Program curriculum.	During the course of one year, students are required to write a research paper on a topic relevant to maritime safety and security.	Master of Policy Studies
Strategic Studies Program	Students must complete a minimum of 31 credits (excluding credits for class subjects belonging to Category X), of which 22 must come from Category I and 9 from Category II of the Strategic Studies Program curriculum.	Students must pass (a) an examination on the results of their research on a specific topic, and (b) the final examination.	Master of Policy Studies

Master Thesis/Policy Paper

Review Structure and Evaluation Criteria

Most of the students at GRIPS are mid-career bureaucrats sent from governmental organizations, so master's theses are aimed at improving the students' policymaking ability. Specific policy issues that are of interest to each individual student are selected, with analyses of policy effectiveness based on inter-disciplinary academic fields (e.g., economics, politics, public administration, engineering) and on policy evaluation. In evaluation of master's theses or research papers on specific topic, the criteria for assessment shall be determined by objective and rational analyses based on various scholarly methodologies appropriate to the topic's distinguishing features, as determined independently by each respective program.

Review Structure

For the examination of master students, the program director shall appoint two or more faculty members (main examiner, sub examiner, and other faculty members whom the program director appoints as necessary) and nominate them to the Master's Programs Committee. The Master's Programs Committee shall make the final decision on the review structure.

Examination Method

The Master's Examination shall be done through the evaluation of the Master's thesis or policy paper and an oral or written final examination. An oral exam shall consist of the student's presentation and a Q&A session. A written exam questions shall be set by the reviewing faculty members upon consultation with the program director. Regarding the degree paper, the main and sub examiners, with other professors, examine whether the submission meets the standard at a program committee and submit it for the master's review.

Evaluation Criteria

Pass/fail shall be determined from the following viewpoints of evaluation:

Master's Thesis

1. Has set research objectives that have policy relevance and importance
2. Shows original findings
3. Applies and extends theoretical and/or empirical methods used in a relevant discipline(s)
4. The logic is consistent

Policy Paper

1. Has set research objectives that have policy relevance and importance
2. Shows practical policy recommendations or implications
3. Applies theoretical and/or empirical methods used in a relevant discipline(s)
4. The logic is consistent

Final Examination (Written or Oral)

1. The student can explain the content of the research
2. The student can explain original findings and/or contributions in the context of the relevant literature
3. The student can explain the significance of the result

Other information including procedures for submission of papers, presentation of papers, and other examinations are described in "Overview of Research, Guidance and Final Examination for Master Students at GRIPS", which is distributed at the Guidance.

Master's Programs

Master's Programs (International Programs)

Young Leaders Program (School of Government/School of Local Governance)

The Young Leaders Program (YLP) is a scholarship program sponsored by the Japanese Ministry of Education, Culture, Sports, Science and Technology. GRIPS inaugurated the YLP School of Government in 2001, and the YLP School of Local Governance in 2009. The objectives of the YLP program are:

1. To foster future national leaders from designated countries;
2. To build comprehensive human networks among the leaders of nations;
3. To establish friendly relationships among the countries involved, including Japan; and
4. To improve the quality of policy making in the participating countries.

This program is open to exceptionally promising young government officials with considerable working experience in the area of public administration.

A minimum of three years' work experience in the field in the applicant's home country is a prerequisite for admission to the program. Students will be admitted on the basis of an appraisal of their potential to become future leaders in their home countries; to play important roles in their countries' development; and to maintain a lasting friendship with, and trust of, Japan and other countries around the world.

The program is designed to expand students' comparative and historical knowledge of international/regional politics and economics, while providing them with an in-depth understanding of Japanese politics and economy.

The curriculum covers a wide range of topics concerning public administration and policy formulation, and offers the students the opportunity for intensive discussion with politicians, high-level government officials, corporate directors, journalists, and other Japanese leaders. The program also includes a field trip/workshop and the writing of a final paper based on the student's independent study.

One-year Master's Program of Public Policy (MP1)

This program primarily targets mid-career public officials with excellent academic and work credentials, managerial experience, and strong leadership potential. The program equips future managers and leaders with the basic skills and knowledge needed for policy analysis and management. To date the program has produced a steady stream of highly qualified professionals in the public policy arena.

The program offerings consist of both required and elective courses. The core courses provide all MP1 students with a common interdisciplinary and analytical foundation. Students acquire more specialized knowledge by selecting courses in one of four concentration areas: Economic Policy, International Development Studies, International Relations, and Public Policy. A wide range of elective courses offers students the opportunity to broaden and deepen their knowledge. Also offered are practical courses delivered by government officials with extensive experience in actual policy formulation and implementation.

MP1 students are required to produce a policy report in one of the four concentration areas. Policy Debate Seminar I facilitates the students' development and the exchange of ideas related to their policy reports, in the concentration of their choice. In Policy Debate Seminar II, the students finalize their studies and write up their policy reports with the support of their supervisors.

MP1 is primarily aimed at mid-career professionals and staff members from local or national governments and international organizations. Highly qualified individuals with an interest in public policy are also welcome to apply. Financial support is available on a competitive basis. Asian Development Bank (ADB) scholarships are open to application by government officials from Asian countries. Japanese government scholarships are open to application by government officials and researchers from all over the world.

Two-year Master's Program of Public Policy (MP2)

This program aims to provide early and mid-career professionals with the technical skills needed to analyze, design, and implement public policy. The program provides a strong platform for advanced research (including doctoral studies). Students are required to write a master's thesis in one of four areas of public policy: Economic Policy, International Development Studies, International Relations, and Public Policy. In addition to policy workshops, students receive specialized guidance through a program of independent study.

MP2 has a similar structure to that of the one year program, but MP2 students receive more advanced training and guidance in the technical skills needed for public policy analysis. All MP2 students develop a common interdisciplinary and analytical foundation through the core courses. They select from one of four concentration areas and take specialized courses that provide them with strong analytical and quantitative skills. They also have the opportunity to choose from a wide variety of elective courses in academic and practical topics. In their second year, the students utilize their technical skills and practical knowledge in the writing of a master's thesis under the guidance of a highly-trained specialist in their chosen field of concentration.

MP2 welcomes applications from individuals with a strong interest and aptitude for policy analysis. The primary target is promising early and mid-career officials and staff members in local or national governments, international organizations, and research institutes. Highly qualified individuals interested in a career in the public policy field are also welcome to apply. Candidates should have strong academic credentials and a desire to obtain the analytical and quantitative skills needed for the work of professional policy analysts. Financial support is available on a competitive basis, including scholarships from the Asian Development Bank (ADB) and the Japanese Government.

Macroeconomic Policy Program

The Macroeconomic Policy Program (MEP) is a professionally oriented program designed to train modern macroeconomic policy makers and professionals, giving them an understanding of macroeconomic fluctuations and the roles of monetary and fiscal policies in domestic and global

economies, so that they will enhance the capacity of governments to formulate and implement financial and economic policies in a manner that leads to quality growth. The curriculum deals with macroeconomic and structural aspects, including policies aimed at establishing sound macroeconomic fundamentals, liberalized trade, a robust financial system, and a vast private sector. Ample attention is also given to a broader range of issues, such as roles of government; institution building; environmental issues; and sustainable development.

Scholarships for this program, provided by the Japanese government and administered by the International Monetary Fund (IMF), are open to application by promising young officials from the following Asian countries: Bangladesh, Bhutan, Cambodia, India, Indonesia, Kazakhstan, Kyrgyz Republic, Laos, Malaysia, Maldives, Mongolia, Nepal, Pacific Island countries, Papua New Guinea, Philippines, Sri Lanka, Tajikistan, Thailand, Timor-Leste, Turkmenistan, Uzbekistan, and Vietnam. The program is primarily aimed at officials of ministries of finance, economy, and planning, and of central banks. However, suitable candidates from other parts of government are also admitted.

Public Finance Program

The Public Finance Program, launched in 1997, is operated by GRIPS and fully supported by the World Bank and the World Customs Organization.

The Public Finance Program is designed specifically for professionals in the field of taxation and customs. The major objective of the Public Finance Program is to equip students with both the theoretical knowledge and practical skills necessary to excel as leaders in these areas. The program is comprised of two segments: an academic segment common to tax and customs scholars; and a practicum segment, which is devoted to tax or customs, depending on the scholar's stream.

The academic segment of the program provides rigorous economics-oriented training aimed at developing an understanding of the theoretical, empirical, and institutional aspects of tax and customs policy implementation and administration in the context of the economic and social development of developing countries. A practicum operated by or in collaboration with the National Tax Administration or

the Customs Training Institute gives students an opportunity to enhance their learning with hands-on experience in a tax/customs-related work environment and to integrate that experience into their formal education.

Economics, Planning, and Public Policy Program

This program is designed to enable government officials to contribute to good governance and economic development in Indonesia.

Indonesia is undergoing an enormous transformation. The “two D’s”—robust democratization and radical decentralization—are fundamentally reshaping the country's political, economic and social landscape. To help Indonesia meet the challenges arising as a result of this transformation, the GRIPS-Indonesia Linkage Master's Program (LMP) was designed to develop highly capable central and local government officials well equipped to contribute to Indonesia's capacity to continue on the road to good governance and economic prosperity.

This collaborative academic program is offered by GRIPS in cooperation with Indonesia's premier national universities: Universitas Indonesia; Universitas Gadjad Mada; Universitas Brawijaya; and Universitas Padjadjaran. During the two-year program, with the first year offered in Indonesia and the second at GRIPS, the students enjoy excellent opportunities to combine theory with practical skills, and research with action. Special emphasis is placed on developing core skills in areas that will be valuable to them: economics, political science, public policy, and public management. The Program's approach is multidisciplinary and covers a wide range of topics, allowing the fellows to select the courses that suit their individual needs.

GRIPS offers LMP students a distinctive learning environment in which they have abundant opportunities to interact with and learn from a diverse international group of faculty members and their own peers, mid-career government officials from all over the world. In addition, the faculty's vast network of contacts and the ideal location of the campus in the heart of metropolitan Tokyo offer the students easy access to the Japanese policymaking community.

ASEAN Initiatives Program

This program aims to contribute to the capacity building of young ASEAN administrators, promote ASEAN integration, and effectively implement the Japanese government's support of ASEAN.

The ASEAN Secretariat and GRIPS' collaborative degree program provides an opportunity for young ASEAN administrators to obtain a master's degree through one year of study as part of ASEAN's regional integration project. The ASEAN Secretariat has a program to provide young administrators from ASEAN member countries with a one-year work experience at the ASEAN Secretariat as part of the Japanese Government's support to ASEAN. The collaborative degree program targets participants who have completed the work experience program and aims to further improve their administrative and diplomatic skills, cultivate the qualities of future national leaders, and develop human resources who will contribute to ASEAN's regional integration and friendly relations between Japan and ASEAN. The collaborative degree program is a unique initiative that combines work experience in the ASEAN Secretariat with the development of leaders and policy professionals for democratic governance through GRIPS, enabling participants to acquire a broad knowledge of public policy and to improve their practical problem-solving skills. Participants deepen their understanding of Japan by learning about the Japanese political and economic situation and policy issues, and conduct policy research to effectively realize the ASEAN Outlook on the Indo-Pacific (AOIP), democracy, and the rule of law.

Disaster Management Policy Program

Natural disasters result in crippling economic losses and human tragedy, in turn hampering development, particularly in developing countries, where many people reside in vulnerable buildings and areas. In order to mitigate the effects of natural disasters, particularly human losses, there is a need to promote proactive disaster risk management, preferably in a multi-disciplinary fashion. To that end, it is essential to cultivate, through professional education and training, disaster management experts with the expertise to develop appropriate disaster management policies and techniques that

4. Degree Programs for Master's Students

harmonize with local conditions, and put those policies and techniques into practice.

In order to enhance the capacity of professionals in developing countries to cope with natural disasters, GRIPS offers a master's degree program in Disaster Management Policy in collaboration with the International Institute of Seismology and Earthquake Engineering (IISEE) of the Building Research Institute (BRI); the International Centre for Water Hazard and Risk Management (ICHARM) of the Public Works Research Institute (PWRI); and the Japan International Cooperation Agency (JICA). This program is administered as a JICA Knowledge Co-Creation Program, supported by official development assistance from the Government of Japan.

This program is designed to give disaster risk management professionals from developing countries an opportunity to: study in one of the four courses (seismology, earthquake engineering, tsunami disaster mitigation, and water-related disaster management); obtain foundation disaster risk management knowledge; study the theories which constitute the foundation of disaster management policy; study Japanese disaster management policy and systems; and acquire the ability to apply problem-solving approaches to the development of concrete technologies and policy appropriate to local conditions.

In addition to developing expertise in their areas of study, the students will obtain a bird's-eye view of the entire field of disaster management, beyond the limits of their specializations; they will attend lectures, make presentations, and engage in discussions of topics related to the field of disaster management in order to deepen their understanding of other research areas. They will also have an opportunity to take part in group fieldwork in locations across Tokyo. This fieldwork brings together students with different specializations, from governments and organizations of a number of countries, for an innovative two-day exercise in which they give joint presentations with Japanese students from the Disaster Risk Management Concentration and the Infrastructure Policy Concentration.

Maritime Safety and Security Policy Program

The MSP is a collaborative program administered

jointly by GRIPS and the Japan Coast Guard (JCG). This program makes it possible for the students to benefit from both institutions' resources in the fields of public policy, international relations, and maritime safety and security. The students will have the opportunity to acquire advanced knowledge, analytical and communication skills relevant to their work while becoming members of a network of future coast guard leaders in the Indo-Pacific.

With financial support from the Japan International Cooperation Agency (JICA), junior coast guard officers from different parts of the Indo-Pacific region will study at GRIPS in Tokyo during the first half of the academic year and in Kure, Hiroshima at the Japan Coast Guard Academy (JCGA)—the JCG's most important educational institution—during the second half of the academic year.

Study at GRIPS

After enrolling in the program, the students will take required and elective courses at GRIPS from October through March. The students are expected to gain advanced knowledge in the fields of public policy and international relations, and to nurture general academic skills to prepare for research paper writing.

Study at the JCGA

From April through July, the students will take courses and participate in practical training and educational programs at the JCGA. The students will attend lectures focusing on past maritime incidents and possible future scenarios, offered by leading experts and JCG officers.

Research Paper

Over the course of the year, each student will write a required research paper on issues relevant to the study of maritime safety and security, to be completed before graduation. Each student will work with two academic advisors—one each from GRIPS and JCGA.

Master's Programs (Domestic Programs)

Public Policy Program

This program targets individuals from a wide variety of backgrounds relevant to policy research. The students include: administrative officials who are candidates to become executive officers in central government ministries and agencies, in local governments, and in private companies; and aspiring policy analysts. The Program is designed to cultivate professional leaders and innovative policy analysts who possess not only a high level of technical knowledge but also an awareness of the social responsibilities attendant upon their positions.

In some concentrations, students are required to take courses delivered in English.

Regional Policy Concentration

Regional areas today face a great number of dilemmas, problems, and opportunities, and only through rigorous analysis and planning can decision makers arrive at policies that support the growth and development of a particular region. The Regional Policy Concentration is designed to prepare local government officials/professionals to examine and analyze regional problems, devise effective strategies for solution of those problems, and guide the implementation of those strategies. The Concentration teaches public policy knowledge and techniques, with an emphasis on regional issues, to a target group of junior and mid-career local government officials who, as future local government executives, will be implementing policy initiatives and devising new strategies.

The Concentration's core courses give the students a firm basis for logical thinking and analysis, develop their sensitivity to policy problems, and enhance their planning capability. The curriculum also includes a policy research seminar and several other courses in which students are exposed to a broad array of issues, information, and methods. In the seminar, the students develop relevant solutions to real-world policy issues faced by local governments. Each student prepares a proposal paper in which they present their own policy issue responses.

Infrastructure Policy Concentration

This concentration is designed for infrastructure policy professionals; its objective is similar to that of the Public Policy Program. However, the particular focus of this concentration is the implementation of infrastructure projects. The concentration seeks to attract not only junior and mid-career officials in national government, but also staff of public and quasi-public corporations, and private companies involved in implementing infrastructure projects in cooperation with the public sector. Whereas candidates for the Public Policy Program typically have undergraduate training in law, economics, political science, or public administration, the Infrastructure Policy Concentration is mainly geared toward individuals with a civil engineering background.

In addition to addressing policy questions, the concentration is concerned with critical evaluation of the impact of policy at strategic and practical levels. It aims to give the students a firm grounding in economics and management and familiarize them with the basic policymaking tools needed for work toward the socio-economic development of a country. Other main subjects include: economics of the public sector, private finance initiatives, project feasibility and evaluation methods, project cycle management, project implementation, and global issues for sustainability.

Disaster Risk Management Concentration

The 2011 Great East Japan Earthquake Disaster revealed that Japan, which is one of the most advanced countries in the field of disaster mitigation should further improve its disaster risk management policies, including, mitigation, preparedness, emergency response, recovery, and reconstruction.

This concentration aims to provide the students with an opportunity to learn about the latest policies and issues in the field of disaster risk management, based on lessons learned from recent disasters, to equip them to develop policies and take appropriate actions on a multi-disciplinary basis, before, during, and after disasters. This program seeks to attract national and local government officers and staff of public and private organizations who are involved in, or will be involved in disaster risk management. The curriculum provides the foundation practical, legal,

4. Degree Programs for Master's Students

economic, and technological knowledge essential for disaster risk management work.

Healthcare Policy Concentration

Recent unprecedented population aging and declining birthrate in Japan have made healthcare one of the most important policy areas. This is not only healthcare in the narrow sense but also healthcare as an inclusive concept, encompassing long-term care, welfare, employment, and even urban planning.

This Concentration is designed to give the students: 1) fundamental knowledge, theory and analytical techniques; 2) a solid understanding of the essence of challenges; and 3) the skills needed to formulate comprehensive policies regarding healthcare and related issues.

The core courses are theoretical and comprehensive, but at the same time they have a practical component essential for the design of healthcare policy and its related issues: in addition to the course lectures, delivered by faculty with deep knowledge of and extensive experience in the field, guest lectures are given by invited speakers such as government officers from Japan's Ministry of Health, Labour and Welfare, and practicing experts including medical doctors.

Agricultural Policy Concentration

In recent times domestic lifestyles in Japan have been changing as a result of declining birthrate and aging population; at the same time, global food markets have been growing. This situation calls for regional revitalization and the encouragement of population movement to rural areas. There is also a need for new techniques such as adding value to agricultural products through the development of regional charm. Such approaches require innovative policy formation, and steady implementation of such policy in cooperation with private sector partners such as agriculture, forestry, fisheries and food industry enterprises. The agricultural policy concentration aims to give the students a deep understanding of policy trends and issues in agriculture and related fields, by (a) developing human resources who can lead regional policy development, and (b) offering training in the necessary public policy theory, knowledge, and analytical methods.

Science, Technology and Innovation Policy Concentration

In a knowledge-based society, where knowledge has a major impact on economic and social development, the role of science, technology, and innovation policies is rapidly expanding, not only in the development of scientific knowledge, but also in the creation of new industries and the resolution of social issues such as those addressed by the SDGs. Also, in the age of digitization, research development and innovation methodology have changed; this calls for an understanding of the form that policies and management should take.

This concentration aims to cultivate human resources who can apply a scientific approach to the planning, drafting, execution, evaluation and revision of STI policy and strategy. In particular, we intend to equip administrative officials and practitioners with the skills they need for STI policy analysis and planning.

International Cooperation Concentration

The Sustainable Development Goals (SDGs) are an urgent call for action by all countries in a global partnership. Aiming to contribute to the achievement of the SDGs, this concentration is designed for future leaders in the field of international development and international cooperation. The concentration seeks to attract officers of central and local governments, international/aid organizations, NPOs, private companies, and the like. Graduates of this concentration are expected to play leading roles in this area within and outside Japan.

This concentration, as an integral part of the domestic program, aims to cultivate professionals in public policy. At the same time, English is the language of instruction for the courses; domestic students are expected to discuss issues related to international development with foreign students, most of whom are mid-career government officials from other countries. Together with other elective courses, the courses in this curriculum enable students to develop valuable skills and cultivate domestic and international networks.

Urban Policy Concentration

Faced with a declining birthrate and an aging population, many of Japan's regional cities are facing critical challenges. On the other hand, regional cities have increasing opportunities to promote their

attractiveness, given the increasing number of foreign tourists and the spread of teleworking. The time has come to seriously address the issues currently faced by regional cities.

Against this background, this concentration aims to cultivate human resources with the ability to analyze and evaluate actual urban and regional policy issues through analysis of quantitative and qualitative data, and to conduct evidence based policy making (EBPM).

Working largely on a microeconomics foundation, this concentration offers a variety of courses, including those for the study of analysis and evaluation methods such as econometrics and cost-benefit analysis, and those that apply their methods to actual case studies. This concentration also offers courses related to the legal system to support the realization of the results of analysis and evaluation in the form of policies.

In addition, students will apply the knowledge they have gained in the above courses; write policy papers based on the results of the analysis and evaluation of policy issues; and make policy recommendations, all with the aim of acquiring a comprehensive set of practical EBPM skills.

This curriculum, organized to proceed from basic to applied, and from knowledge to practice, empowers the students to learn with confidence regardless of their work experience or academic background.

This concentration welcomes people who have a desire to practice EBPM, including (but not limited to) national and local government officials; employees of independent administrative agencies; employees of companies working with the public sector; consultants; experts such as real estate appraisers, architects, and employees of non-profit organizations; and those engaged in urban policy work, urban regeneration, housing and construction policy work, and policy work related to a wide range of urban development concerns, including the environment, education, labor, and welfare.

Open Concentration

This concentration focuses on developing skills in problem analysis and policy planning across various policy areas. Students enrolling in this program will be equipped with the capabilities to contribute effectively to diverse policy fields.

Each student chooses a main field of study (e.g., diplomacy, defense, public finance, monetary policy, industry, trade, environment, labor, or

social security) and registers for five courses related to her/his chosen field. It is strongly recommended that the students also complete the Global Studies Course.

Science, Technology and Innovation Policy Program

In a knowledge-based society, where knowledge has a major impact on economic and social development, the role of science, technology, and innovation policies is rapidly expanding, not only in the development of scientific knowledge, but also in the creation of new industries and the resolution of social issues such as those addressed by the SDGs. Also, in the age of digitization, research development and innovation methodology have changed; this calls for an understanding of the form that policies and management should take.

This program aims to foster both a) skilled professionals who can plan, draft, implement, evaluate and revise science and technology innovation (STI) policy and strategies using scientific approaches; and b) well-prepared Ph.D. entrants who aim to become researchers. In order to give the participants the advanced policy research capabilities and the ability to plan and implement policy and strategy that are required of such human resources, the curriculum is designed to equip them with knowledge and skills in multiple essential disciplines; analytical skills in various fields of social science; and foreign language skills.

The program duration is two years. The classes are held in the evenings and on Saturdays, which makes it possible for students to obtain a master's degree without taking leave from their jobs.

Global Leadership Development Program

Amidst rising competition in the 21st century, where multilateral diplomacy is frequently undertaken alongside bilateral diplomacy, there is an increasing demand for professionals who are well-versed in international affairs, skilled in strategic thinking, and possess excellent communication skills. Such diplomatic competencies are required not only of diplomats, but also of those in diverse leadership roles throughout government ministries and agencies, quasi-governmental organizations, and city and municipal governments. Moreover, companies facing rapid changes in international affairs are in

4. Degree Programs for Master's Students

need of human resources who can accurately judge geopolitical risks as they negotiate with their counterparts and work to effectively engage foreign governments, international organizations, and NGOs. The media, too, are expected to go beyond simply broadcasting news on international affairs; they are also expected to investigate, analyze, and educate.

The Global Leadership Development Program, which emphasizes practical training in tandem with a systematic understanding of international relations, is dedicated to developing Japan's human resources equipped with genuine diplomatic skills, who can provide any organization with planning, analytical, and negotiation skills appropriate for competitive international settings. Coursework in the program is multi-disciplinary, incorporating theoretical and practical study, and each student is required to write a master's thesis or policy paper in English.

Strategic Studies Program

The Strategic Studies Program, offered jointly by GRIPS and the National Institute for Defense Studies (NIDS) of the Japanese Ministry of Defense, is designed to give senior military officers and defense officials theoretical and practical knowledge of advanced level strategic and defense issues, and training in the application of that knowledge. Through the program, the students will enhance the effectiveness of their analysis of domestic and international strategic environments; their planning and implementation of policy; and their ability to operate multinational security missions.

In the course of the year, the students will take required and elective courses at both GRIPS and NIDS. The required courses, on topics including theoretical aspects of security studies, military history, and contemporary policy issues, provide a critical basis for advanced security studies. The elective courses give students (a) deeper knowledge of both broad and specialized issues, including issues related to civil-military relations; space and security; the defense industry and technology; regional security affairs of the United States, China, Korea, Southeast Asia, South Asia, and the Middle East; and (b) a strong command of methods for analysis of the international strategic environment.

In addition, the program conducts policy

simulations to enable the students to apply their classroom learning to actual policy formulation and implementation processes. The students receive instruction in issues related to policymaking; conduct actual research; and engage in group debates on different aspects of security policy issues, embedded in a variety of scenarios. They will also learn practical lessons about effective coordination with government agencies and foreign countries.

Finally, while the students are completing their course work, each student is expected to write research paper, equivalent to a master's thesis, on relevant theoretical and/or policy issues. Although conducted as a domestic program, students are encouraged to write this paper in English, and relevant assistance will be provided in doing so.

Academic Year 2024-2025 Curriculum Master's Programs

(5)-1 Young Leaders Program (School of Government)

Category	Course No.	Course Name	Instructor	Term	Credit	
I Required Courses	GEN5020E	The World and the SDGs	KUDO Toshihiro, et al.	Fall	1	11

Notes:

1. Graduation Requirements

Students must

- enroll for at least one year,
- complete a minimum of 30 credits, 11 of which must come from Category I, at least 8 of which must come from Category II, and the rest can from Categories II and/or III,
- receive necessary research guidance and complete a thesis or a research paper.

2. Courses offered in the program are subject to change.

3. Students cannot take courses conducted in Japanese without the Director's approval.

If a student takes the same course in both English and Japanese, only one (2 credits) will count toward the degree.

4. * Students must complete a minimum of 2 credits from either Microeconomics I or Essential Microeconomics.

5. ** Students must complete a minimum of 2 credits from the following: ECO3600E, ECO3610E and ECO3810E.

6. *** Students must complete a minimum of 2 credits (one course) from either GOV2100E or GOV2200EA or GOV2200EB. Students are not allowed to take both GOV2200EA or GOV2200EB for credit.

7. **** If a student takes only one course from Government and Politics in Japan or International Relations, he/she must take at least one course from the following: GOV2210E, GOV2240EA, GOV2310E, and GOV2580E.

8. ***** Course numbers, instructors, and terms will be announced following official determination of course offerings.

9. ***** Credits earned in these courses will not count toward the degree.

10. Students must take LAN0300E, LAN0310E and LAN0320E. Students may be exempted from taking LAN0310E depending on the result of the English Placement Test and may be exempted from taking LAN0320E if they obtain the approval of their main advisor.

Notes:

1. Graduation Requirements

Students in MEP1 must

- enroll for at least one year.
- complete a minimum of 30 credits, 13 of which must come from Category I, and 12 from Category II. The remaining 5 credits may be taken from Categories II and/or III.
- receive necessary research guidance and complete a policy paper.

Students in MEP2 must

- enroll for at least two years.
- complete a minimum of 36 credits, 13 of which must come from Category I, and 16 from Category II. The remaining 7 credits may be taken from Categories II and/or III.
- receive necessary research guidance and complete a thesis.

2. Courses offered in the program are subject to change.

3. Students can not take courses conducted in Japanese without the consent of the Program Director.

If a student takes the same course in both English and Japanese, only one course (2 credits) will count toward the degree.

4. *Course Number, Instructor, and Term for these courses will be announced when the course is offered.

5. ** Credits earned in these courses cannot count toward the degree.

6. Qualified students are those who have successfully completed the six courses (ECO1000E, ECO1060E, ECO2000E, ECO2060E, ECO2720E, ECO3000E) with a GPA equal to or higher than 3.5 over the six courses or MEP1 students who have excellent background in mathematics and econometrics and obtained the consent of the Program Director.

7. Students must take LAN0300E, LAN0310E and LAN0320E. Students may be exempted from taking LAN0310E depending on the result of the English Placement Test and may be exempted from taking LAN0320E if they obtain the approval of their main advisor.

Notes:

1. Graduation Requirements

Students must

1) enroll for at least a year

2) complete a minimum of 32 credits and meet the following requirements:

(a) Tax students must complete the following courses: PFP2520E, PFP5010E, ECO1000EB, ECO3100E, ECO4130E and GEN5020E from Category I

(b) Customs students must complete the following courses: PFP5110E, PFP5120E, PFP5130E, PFP5210E, ECO1000EB, ECO3100E, ECO4130E and GEN5020E from Category I.

3) receive necessary research guidance and complete a thesis.

2. Courses offered in the Program are subject to change.

3. Students cannot take courses conducted in Japanese without Director's approval.

If a student takes the same course in both English and Japanese, only one course (2 credits) will count toward the degree.

4. *Course Number, Instructor, and Term for these courses will be announced later when the course is offered.

5.**Credits earned in these courses cannot count toward the degree.

6. Students must take LAN0300E, LAN0310E and LAN0320E. Students may be exempted from taking LAN0310E depending on the result of the English Placement Test and may be exempted from taking LAN0320E if they obtain the approval of their main advisor.

	その他ディレクターが適当と認める科目		秋～夏		
区分 III 選択科目		上記以外の授業科目			
区分 X その他		プロフェッショナル・コミュニケーションセンター開講科目			

備考

1 修了要件

- 1) 1年以上の在学
- 2) 区分Iを22単位、区分IIを9単位以上、合計31単位(区分Xに属する科目の単位を除く。)以上を修得
- 3) 必要な研究指導を受けた上で、特定の課題に関する研究論文を執筆・発表し、合格判定を受ける

2 授業科目は、年度途中で追加開設・変更される場合がある。

3 GOV2200EAとGOV2200EBはいずれか一方を履修することができる。

4 授業内容が同じである日本語の授業科目と英語の授業科目の両方を履修した場合は、いずれか一方の単位を修了に必要な単位としてカウントする。

Certificate in Data Science for Policy Studies

Overview

To encourage GRIPS students to take data science-related courses, GRIPS established a Certificate System in Data Science (DS) for Policy Studies in October 2021. Under the certificate system, students will be awarded a DS certificate upon fulfilling all the followings requirements

Application.

Students must submit DS Certificate Application Form to Academic Support Team during the registration period for the spring II term (for September graduates) or the fall II term (for March graduates). Further application process and other important notes will be provided separately.

Requirements for DS certificate

1. Earning two or more credits from the following data science basic/core courses:

- Introduction to Data Science I
- Introduction to Data Science II
- Data Science for Public Policy

Four other courses are offered in Japanese.

2. Earning 10 (two-credit courses x five) or more credits (five two-credit courses) from the data science-related courses, including ones listed above (please refer to Table1: List of Data Science-related Courses to see all).

<別紙 1:/Table 1>

※1 *を付した科目はデータサイエンス基幹的・基礎的科目。
Courses with * are data science basic/core courses.

※2 開講学期及び担当教員の変更や開講しない場合がある。
The term as well as instructors of a course may be changed or it may not be offered.

※3 修了直前の夏学期または冬学期の科目は、成績評価のスケジュールの都合上、DS認定証授与要件には含まれない場合があるので注意すること。
Note that data science related courses completed in the summer or winter term immediately before completion may not be registered at the time of certificate judgement, due to the timing of grading.
